Source: Insight Investment and Rimes. Fund performance is shown for share class S £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. Investors must read all performance information alongside the full performance information in the KIID.

FUND MANAGER COMMENTS

The fund delivered a slight negative return over the month driven largely by poor performance of the South African Rand and Latin American currencies. The Rand's poor performance came off the back of ongoing loadshedding in South Africa. This put pressure on their ability to produce goods, which was seen as an inflationary shock which prompted the Central Bank to hike rates 50bp in May. However, this was partially offset as our duration positions in Latin America, notably Brazil, rallied towards our targets and we took profits.

FUND FACTS

Fund size: £24.7m

Inception date: 25 May 2007
