Source: Insight Investment and Rimes. Fund performance is shown for share class B € Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for 3 Month Euribor. Benchmark used is the shareclass currency equivalent of SONIA. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

## FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in May. Risk assets performed poorly over the month, due to US debt ceiling negotiations, rate rises, concerns over US regional banks and signs of a slowing global economy. European structured credit continued to perform well, owing to strong technical and fundamental underpinnings that are expected to last, except for modest credit deterioration stemming from the lagged effects of recent rate rises. May saw strong issuance, with major UK banks returning to the market. In contrast, US structured credit was more mixed. Over the month, prime and subprime automotive loans, fleet lease, floorplan and private student loan spreads tightened, but unsecured consumer, automotive lease and rental car spreads widened. Delinquencies increased across all consumer sectors. May was quiet on the lending side. During the month, there were no notable contributors to performance. We were opportunistic in our purchases.
