

Monthly Income Fund

A Sub Fund of the Insight Investment Professional Funds ICVC

Insight
INVESTMENT

FACTSHEET -- 31 JULY 2010

INVESTMENT OBJECTIVE AND POLICY

The Fund aims to provide a high and increasing monthly income together with long-term capital growth by investing primarily in shares of UK companies and sterling denominated fixed interest securities. The fund manager invests in a diversified portfolio of UK shares and government bonds. Although not fixed, the Fund will usually have about 70% invested in shares and 30% in government bonds. There is no restriction on the duration of the underlying bonds held. The Fund uses derivatives only for efficient portfolio management purposes.

PERFORMANCE %

To 30 June	2005-2006	2006-2007	2007-2008	2008-2009	2009-2010
Fund	14.6	11.8	-12.2	-11.0	17.7

To 31 July 10	Fund	B'mark	Sector	Quartile
3 month (%)	-1.7	-1.5	-2.4	2
YTD (%)	3.5	2.8	2.3	2
1 year (%)	17.0	16.3	15.7	2
Since inception (% p.a.)	8.1	8.5	7.5	1

Past performance is not a guide to future performance.

FIVE YEAR PERFORMANCE

Basis: Class (A-Retail, full charge basis) shares, mid to mid excluding initial charge, income reinvested net of UK tax. Source: Lipper, a REUTERS company. Fund Benchmark: 70% FTSE All Share, 30% FTSE A British Govt 5-15 yrs. Inception date: 11 Feb 1989. Quartile is the ranking of a particular portfolio or manager in a league table of returns (In one of four quarters).

FUND MANAGER'S COMMENTS

The Fund outperformed its benchmark over the month. Risk assets rebounded strongly in July as investors bought back into equities following the sharp sell-off in the previous months. Strong US earnings results also dampened worries surrounding the state of the US economy. GDP growth of 1.1% for the second quarter was almost twice as much as economists forecast, in the fastest expansion for four years as rebounding services, manufacturing and construction data ignited the recovery. The rebound in risk assets meant that the Fund's overweight positions L&G, Aviva, Barclays and Lloyds Banking Group all added good performance as financials outperformed over the month. Tomkins was the main contributor to performance as the stock rose sharply on the back of a bid approach. Rio Tinto was also positive, although zero holdings in Xstrata and BHP Billiton slightly held back performance as commodity stocks outperformed. Activity over the month was reasonably muted; however, we took the opportunity to trim our holding in Compass Group on the back of healthy share price appreciation.

Past performance is not a guide to future performance. The value of investments and any income will fluctuate (this may partly be due to exchange rate changes) and investors may not get back the amount invested.

All data is as at the date of this factsheet unless stated otherwise

Monthly Income Fund

KEY FEATURES

- Focused income portfolio with exposure to equities and fixed income
- Fund pays monthly income distribution
- Stable team and consistent investment process

INVESTMENT PHILOSOPHY AND PROCESS

The Fund follows a distinct and contrarian strategy which focuses on investing in undervalued stocks where recovery is seen. As a result the Fund aims to be successful in all parts of the economic cycle.

Our stock selection approach is primarily based on fundamental analysis and, unlike similar funds which are heavily biased towards mid and small cap companies, the Fund focuses on large cap stocks with their superior liquidity and scalability benefits. The Fund invests where there is a strong conviction and not simply to cancel out any perceived risk of not holding stocks in the benchmark.

Equities: The Fund aims to provide a high and increasing monthly income by investing primarily (up to 80%) in shares of UK companies.

Bonds: The Fund focuses on quality government debt preferring to pursue 'credit' through the equity market. This focus on high quality debt provides downside protection in the event of any reoccurrence of disinflation or deflation.

Cash: Cash is held as an alternative to bonds, where short-dated debt is deemed preferable to longer-dated issues.

As with UK equities, bonds and cash must not together comprise more than 80% of the Fund.

RISK ASSOCIATED WITH THE FUND

- **Charges to capital:** The fund annual management charge is deducted from capital. Whilst this increases the income paid, it will also reduce the potential for capital growth.

FUND MANAGER PROFILE

Tim Rees
Portfolio Manager,
UK Equities

Tim joined Insight (formerly Clerical Medical Investment Management) in May 1984 and works within our UK Equity team as a portfolio manager with a focus on UK equity income investments. Tim worked in various roles at Clerical Medical, transferring to the investment team in 1987 and then the UK equities team in 1990. Tim holds a BA honours degree in Philosophy and Economics from the University of East Anglia.

FUND RATINGS

Fund ratings by Standard and Poor's Fund Services demonstrates the ability to provide above average returns over a long-term period (relative to funds in the same sector) along with a strong ability to adhere to a consistent investment process.

An AA rating from OBSR Fund Management reflects a strong investment process, which is expected to produce superior long-term results within its investment style.
