

## INSIGHT BONDS PLUS FUND

### **Supplement dated 16 November 2009 to the Prospectus for Insight LDI Solutions Plus plc**

(an umbrella open-ended investment company with variable capital and segregated liability between sub-funds)

This Supplement contains specific information in relation to the Insight Bonds Plus Fund, a Fund of Insight LDI Solutions Plus p.l.c. (the **Company**) an umbrella type open-ended investment company with variable capital with segregated liability between sub-funds authorised by the Financial Regulator pursuant to Part XIII of the Companies Act, 1990.

**This Supplement forms part of and should be read in conjunction with the general description of the Company contained in the Prospectus of the Company dated 30 September 2009 (the Prospectus).**

The Directors of the Company whose names appear under Directors of the Company in the Prospectus, accept responsibility for the information contained in the Prospectus and this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) such information is in accordance with the facts and does not omit anything likely to affect the import of such information. The Directors accept responsibility accordingly.

The Class S Shares of the Insight Bonds Plus Fund were listed on the Official List and admitted to trading on the Main Market of the Irish Stock Exchange on 5 September 2006. No application has been made for the Class S Shares of the Insight Bonds Plus Fund to be listed on any other stock exchange. The Directors do not anticipate that an active secondary market will develop in the Class S Shares of the Insight Bonds Plus Fund.

Words and expressions defined in the Prospectus shall, unless the context otherwise requires, have the same meaning when used in this Supplement.

## **The Insight Bonds Plus Fund (the Fund)**

### **INVESTMENT OBJECTIVE AND POLICIES**

#### **Investment Objective**

The investment objective of the Fund is to seek to deliver positive absolute returns on an annual basis.

The Articles provide that the investment objective and policies for the Fund will be formulated by the Directors at the time of the creation of the Fund.

#### **Investment Policy**

The Fund will seek to achieve its investment objective by investing in bonds and bond related instruments and other types of securities set out below. The Fund may take long or short positions in these securities either through direct investment or through the use of financial derivative instruments listed below. Whilst the Fund's base currency is Sterling, it may invest in non-Sterling denominated assets which may not necessarily be hedged back into Sterling.

##### **(a) Liquid or Near Cash Assets**

The Fund may invest in a broad range of other liquid or near cash assets including, but not limited to, securities, instruments and obligations issued or guaranteed by the UK government or other sovereign governments or their agencies and securities, instruments and obligations issued by supranational or public international bodies, banks, corporates or other commercial issuers.

These types of securities, instruments and obligations are described below and may be issued by both UK and non-UK issuers.

Investments may be made on recognised exchanges and markets (primarily but not exclusively UK markets).

UK Government Gilts – Fixed interest or index-linked securities issued by Her Majesty's Government.

UK Government T-Bills – Short-term securities issued by Her Majesty's Government.

Non-UK Government Sovereign Bonds – Bonds denominated in Sterling which are issued or guaranteed by one or more non-UK sovereign governments or by any of their political sub-divisions, agencies or instrumentalities. Bonds of such political sub-divisions, agencies or instrumentalities are often, but not always, supported by the full faith and credit of the relevant non-UK sovereign government.

Supranational Bonds – Debt obligations issued or guaranteed by supranational entities and public international bodies including but not limited to international organisations designated or supported by governmental entities to promote economic reconstruction or development and international banking institutions and related government agencies including the Asian Development Bank, the European Bank for Reconstruction and Development, the Inter-American Development Bank, the International Monetary Fund, the European Investment Bank, the International Bank for Reconstruction and Development (the World Bank) (collectively "**Supranational Entities**").

Asset Backed Securities ("**ABSs**") – ABSs are securities issued by corporations or other entities (including public and local authorities) which are collateralised by mortgages, charges or other debt obligations or rights to receivables.

Certificates of Deposit – Negotiable interest-bearing debt instruments with a specific maturity. Certificates of deposit are issued by banks, building societies and other financial institutions in exchange for the deposit of funds.

Floating Rate Notes ("**FRNs**") – FRNs are debt securities issued by banks, building societies and other financial institutions with a variable interest rate. The interest rate payable on FRNs may be reset periodically by reference to some independent interest rate index or according to a prescribed formula.

Short and Medium Term Obligations – Debt obligations, notes, debentures or bonds including but not limited to certificates of deposit, commercial paper, floating rate notes or short dated fixed rate bonds or any other type of debt instrument which are transferable securities listed or traded on recognised exchanges.

Commercial Paper – Unsecured short-term promissory notes issued by corporations and other entities.

It is intended that investments within this paragraph (a) will have at the time of purchase a short term credit rating of at least A1 and/or a long term credit rating of at least A (or in each case its equivalent) from a recognised rating agency such as Standard & Poor's or be deemed by the Sub-Investment Manager to be of equivalent quality. Bonds acquired by the Fund may be fixed or floating rate securities.

**(b) High Yield Securities**

The Fund may also invest in a broad range of sub-investment grade securities which have a credit rating at the time of purchase of at least Ba1/BB+ or below (or its equivalent) from a recognised rating agency such as Standard & Poor's or be deemed by the Sub-Investment Manager to be of equivalent quality. These include fixed and floating rate debt securities, instruments and obligations which may be available in the prevailing markets (both within and outside Europe) for instruments denominated typically in Sterling, including securities, instruments and obligations issued or guaranteed by corporates or other commercial issuers, European governments or other sovereign governments or their agencies and securities, instruments and obligations issued by supranational or public international bodies and banks. These types of securities, instruments and obligations are described in (c) above and may be issued by both European and non-European issuers and will be predominantly denominated in Sterling.

**(c) Emerging Markets Debt and Currencies**

The Fund may also invest in emerging market debt and securities. These include Brady bonds, sovereign Eurobonds, corporate bonds and loans, sovereign loans, local Treasury bills, notes and bonds, certificates of deposit, commercial paper, structured notes and money market securities. Many of the emerging market securities in which the Fund may invest are, by definition, rated below investment grade (BBB); those issuers with a rating below (BBB) have a lower quality than those having a rating A or more and the investments in securities of these issuers present a high risk.

**(d) Loans**

The Fund may also invest in loans, participations in loans or assignments of loans to borrowers (which can be corporates, sovereign governments, public bodies or others) although it is not envisaged that loans would ever form a substantial part of the Fund's portfolio. There is no rating requirement or particular geographic focus for such loans or the borrowers under such loans.

**(e) Collective investment schemes**

Without limit, the Fund may invest in other open-ended collective investment schemes. Such funds may be domiciled in Ireland, Luxembourg, the Channel Islands, the Cayman Islands or other recognised fund domiciles. Such funds may be constituted as investment companies, unit trusts, limited partnerships or other permitted investment vehicles and may be traded, listed or dealt in on a stock exchange or other regulated market. They may be regulated or unregulated and may be leveraged.

The Fund may specifically invest in money market funds including the ILF GBP Liquidity Fund and the ILF GBP Liquidity Plus Fund. The ILF GBP Liquidity Fund and the ILF GBP Liquidity Plus Fund are both sub-funds of Insight Liquidity Funds p.l.c which is also managed by the Investment Manager and is advised by the Sub-Investment Manager. Insight Liquidity Funds p.l.c. is an open-ended investment company with variable capital incorporated in Ireland with limited liability and is established as an umbrella fund under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2003 as amended. The investment objective of the ILF GBP Liquidity Fund is to provide investors with stability of capital and of net asset value per share (in the case of the stable net asset value shares) and daily liquidity with an income which is comparable to Sterling denominated short dated money market interest rates. The ILF GBP Liquidity Fund invests primarily in liquid or near cash assets with an average weighted maturity of no more than 60 days or such other period as may be required to retain its AAAm rating from Standard & Poor's. The investment objective of the ILF GBP Liquidity Plus Fund is to provide investors with stability of capital and income through investment in short term fixed income and variable rate securities. The ILF GBP Liquidity Plus Fund invests primarily in a similar range of assets with an average weighted maturity of no more than one year or such other period as may be required in order to retain its AAAf/S1 rating from Standard & Poor's. The types of investments in which the ILF GBP Liquidity Fund and the ILF GBP Liquidity Plus Fund may invest include those listed in (a) above.

**(f) Ancillary Liquid Assets**

The Fund may also have ancillary liquid assets such as bank deposits.

**(g) Derivatives**

The Fund may utilise a broad range of derivatives, including without limitation, interest rate swaps, inflation swaps, credit default swaps, currency swaps, futures, options and foreign exchange contracts.

**Interest Rate Swaps**

An interest rate swap is an agreement negotiated between two parties to exchange LIBOR and/or other similarly recognised interest rate cash flows, calculated on a notional amount, at specified dates during the life of the swap. The notional amount is used only to determine the payments under the swap and is not exchanged. The payment obligation of each party is calculated using a different interest rate, typically with one party paying a floating interest rate in return for receiving a fixed interest rate, either at regular intervals during the life of the swap or at the maturity of the swap.

**Inflation Swaps**

An inflation swap operates in a similar way to an interest rate swap except that it is an agreement negotiated between two parties to exchange payments at a fixed or floating rate in return for payments based on realised inflation over the relevant period. The inflation will be referenced to the UK retail price index and/or the limited price index (LPI). LPI means limited price indexation of increases equal to the retail price index, subject to a maximum and minimum annual increase.

**Credit Default Swaps**

Credit default swaps provide a measure of protection against defaults of debt issuers. The Fund's use of credit default swaps does not assure their use will be effective or will have the desired result. The Fund may at the discretion of the Sub-Investment Manager be the buyer and/or seller in credit default swap transactions to which the Fund is a party. Credit default swaps are transactions under which the parties' obligations depend on whether a credit event has occurred in relation to the reference asset. The credit events are specified in the contract and are intended to identify the occurrence of a significant deterioration in the creditworthiness of the reference asset. On settlement, credit default products may be cash settled or involve the physical delivery of an obligation of the reference entity following a default. The buyer in a credit default swap contract is obligated to pay the seller a periodic stream of payments over the term of the contract provided that no event of default on an underlying reference asset has occurred. If a credit event occurs, the seller must pay the buyer the full notional value of the reference asset that may have little or no value. If the Fund is a buyer and no credit event occurs the Fund's losses will be limited to the periodic stream of payments over the term of the contract. As a seller, the Fund will receive a fixed rate of income throughout the term of the contract, provided that there is no credit event. If a credit event occurs, the seller must pay the buyer the full notional value of the reference obligation.

**Currency Swaps**

A currency swap is an agreement between two or more parties to exchange sequences of cash flows over a period in the future. The cash flows that the counterparties make are tied to the value of foreign currencies including Sterling, US Dollar, Euro and Yen. The Fund may use such swaps to cover the risk of the value of a particular currency rising or falling over time.

**Futures**

Futures are contracts to buy or sell a standard quantity of a specific asset (or, in some cases, receive or pay cash based on the performance of an underlying asset, instrument or index) at a pre-determined future date and at a price agreed through a transaction undertaken on an exchange. Futures contracts allow investors to hedge against market risk or gain exposure to the underlying market. Since these contracts are marked-to-market daily, investors can, by closing out their position, exit from their obligation to buy or sell the underlying assets prior to the contract's delivery date. Futures may also be used to equities cash balances, both pending investment of a cash flow and with respect to fixed cash targets. Frequently, using futures to achieve a particular strategy instead of using the underlying or related security or index results in lower transaction costs being incurred.

**Options**

There are two forms of options, put and call options. Put options are contracts sold for a premium that gives one party (the buyer) the right, but not the obligation, to sell to the other party (the seller) of the contract, a specific quantity of a particular product or financial instrument at a specified price. Call options are similar contracts sold for a premium that gives the buyer the right, but not the obligation, to buy from the seller of the option at a

specified price. Options may also be cash settled. The Fund may be a seller or buyer of put and call options.

### **Forward Foreign Exchange Contracts**

A forward contract locks-in the price at which an index or asset may be purchased or sold on a future date. In currency forward contracts, the contract holders are obligated to buy or sell the currency at a specified price, at a specified quantity and on a specified future date.

Any change in the investment objective of the Fund may only be made with the prior written approval of the Financial Regulator and the prior written approval of all the Shareholders of the Fund or by an ordinary resolution of the Shareholders at a general meeting of the Fund. The Directors have the power to change the investment policies of the Fund provided that material changes to the investment policies are only made if approved in writing by all of the Shareholders in the Fund or by an ordinary resolution of the Shareholders at a general meeting of the Fund. In each case reasonable prior notice will be given to Shareholders to enable them to request the repurchase of their Shares prior to the implementation of the change.

### **INVESTMENT RESTRICTIONS**

In addition to the following the general Investment Restriction as set out in the Prospectus shall apply.

As the Fund may have an exposure, in relation to swap agreements and/or other derivatives, to single counterparties in excess of 40% of its net assets through over-the-counter contracts, the Fund will comply with the Financial Regulator's requirements in respect of such counterparties, namely (a) the counterparty will have a minimum credit rating of A1/P1 or equivalent, and (b) the counterparty or its ultimate parent will have shareholders' funds in excess of €200 million (or its equivalent in another currency). The normal limit of 140% of indebtedness does not apply to the Fund. There is no limit on the maximum exposure to any one counterparty. The institutions to which the Fund may have an exposure of up to 40% of its net assets must have a minimum credit rating of A2 or equivalent. In calculating the exposure of the Fund to a single counterparty the value of the collateral paid to or received from a counterparty is taken into account.

### **BORROWING AND LEVERAGE**

The levels of leverage for the Fund are not expected to exceed 200% of the Net Asset Value of the Fund.

The Fund will also have a borrowing facility in place to cover any collateral calls or to provide liquidity for Shareholder subscriptions or repurchases as and when required.

### **RISK FACTORS**

The general risk factors as set out in the Prospectus shall apply. In addition, the following risk factors shall also apply:

#### ***Emerging Markets Risk***

The Fund may invest in emerging markets debt and securities. Investment in emerging markets may increase the volatility of the Fund's Net Asset Value. Accordingly, an investment in the Fund's Shares may be worth more or less on redemption than their original purchase value. Investing in emerging markets involves additional risks and special considerations not typically associated with investing in other more established economies or securities markets. Such risks may include (i) restrictions on foreign investment and on repatriation of capital invested in emerging markets, (2) currency fluctuations, (3) potential price volatility and lesser liquidity of securities traded in emerging markets, (4) economic and political risks, including the risk of nationalization or expropriation of assets or confiscatory taxation, (5) risks related to custodial arrangements and delays or other factors in the settlement of securities transactions, and (6) accounting, auditing, financial and other reporting standards in emerging markets are not equivalent to those in more developed markets.

#### ***Unregulated Collective Investment Schemes***

Investment in unregulated collective investment schemes may not provide the same level of investor protection which is afforded to schemes authorised under Irish laws and regulations and subject to Irish regulations and conditions.

### ***Leveraged Collective Investment Schemes***

To the limited extent that the Fund might invest in leveraged collective investment schemes, while leverage presents opportunities to increasing the schemes' total returns, it also has the effect of potentially increasing losses. Any event that adversely affects the value of a scheme's investments would be magnified to the extent that leverage is employed by the scheme. To the extent that a scheme borrows, the rates at which it can borrow will affect its returns and if it gives security for such borrowings it could be subject to margin calls where the security has declined in value and could suffer a loss if the security has to be enforced in a declining market at relatively low prices.

### ***High Yield/Sub-Investment Grade Securities Risk***

Lower-rated securities will usually offer higher yields than higher-rated securities to compensate for the reduced creditworthiness and increased risk of default that these securities carry. Lower-rated securities generally tend to reflect short-term corporate and market developments to a greater extent than higher-rated securities which react primarily to fluctuations in the general level of interest rates. During an economic downturn or a sustained period of rising interest rates, highly leveraged issuers of high yield securities may experience financial stress and may not have sufficient revenues to meet their interest payment obligations. There are fewer investors in lower-rated securities, and it may be harder to buy and sell securities at an optimum time.

### ***Loan Participation Risk***

In purchasing loan participations, the Fund will acquire contractual rights only against the seller, not the borrower. Payments due to the Fund will only be made to the extent received by the seller from the borrower. Accordingly, the Fund will assume the credit risk of both seller and borrower, as well as of any intermediate participant. The liquidity of assignments and participations is limited and the Fund anticipates that such securities could only be sold to a limited number of institutional investors. This will also make it more difficult to value the Fund and calculate the Net Asset per Share.

### ***Segregated Liability***

Each fund of the Company is a segregated portfolio of assets and will accordingly bear its own liabilities and will be solely liable to third parties for all of the liabilities of the fund.

While the provisions of the Companies Acts 1963-2009 provide for segregated liability between funds of umbrella investment companies, these provisions have yet to be tested in foreign courts, in particular, in satisfying local creditors' claims. Accordingly, it is not free from doubt that the assets of any fund of the Company may not be exposed to the liabilities of other funds of the Company. As at the date of this Supplement, the Directors are not aware of any such existing or contingent liability of any Fund of the Company which could impact on its segregated liability provisions of the Company and its funds.

In addition to the risk factors outlined above and the general risk factors set out in the Prospectus, investors should also note that subscription for Shares of the Fund is not the same as making a deposit with a bank or other deposit taking body and the value of the Shares is not insured or guaranteed. The value of the Fund may be affected by the creditworthiness of issuers of the Fund's investments and, notwithstanding the policy of the Fund of investing in short term instruments, may also be affected by substantial adverse movements in interest rates.

### **DIVIDEND POLICY**

The Directors only intend to make Accumulation Shares available in the Fund. Accumulation Shares carry no right to any dividend. The net income attributable to the Shares in the Fund shall be retained within the Fund and the value of the Shares shall rise accordingly.

### **VALUATION PROVISIONS FOR OFF EXCHANGE DERIVATIVE CONTRACTS**

In accordance with the Articles of Association and the Prospectus of the Company, the Directors have determined that the value of any off exchange derivative contracts entered into by the Fund will be valued monthly at the prices determined by an independent pricing vendor who must be approved for this purpose by the Custodian and the valuation of such contracts shall be reconciled to the counterparty valuation at least monthly by a party independent of the counterparty which could include the Sub-Investment Manager, which party must be approved for such purpose by the Custodian. Any significant differences arising from such reconciliation must be promptly investigated and explained. If a price is not available from an independent pricing vendor, or the price quoted does not in the opinion of the Directors represent fair market value, or if the

Directors otherwise consider it appropriate, off exchange derivative contracts may be valued using an alternative method of valuation provided the value is approved by the Custodian or by using the counterparty valuation which must be approved or verified by a party (which could include the Sub-Investment Manager) which must be approved for this purpose by the Custodian and which is independent of the counterparty. Such independent verification of the counterparty valuation must be carried out at least quarterly. Where the Company values an off exchange derivative contract using an alternative method of valuation to the counterparty valuation, the Company will follow international best practice and adhere to the principles on valuation of off exchange instruments established by bodies such as IOSCO and AIMA.

## KEY INFORMATION FOR PURCHASING AND REPURCHASING

<b>Base Currency</b>	Sterling
<b>Business Day</b>	means a day except a Saturday or a Sunday on which banks in London are open for normal business or such other day(s) as the Directors may, with the approval of the Custodian, determine, and notify to Shareholders in advance.
<b>Dealing Day</b>	means the first Business Day and the 15 <sup>th</sup> day of each month provided that the 15 <sup>th</sup> day is a Business Day (if it is not, the next following Business Day will be a Dealing Day) and/or such other day(s) as may be determined by the Directors from time to time and notified in advance to all Shareholders in the Fund.
<b>Dealing Price</b>	The Price at which Shares of the Fund will be issued or repurchased on a Dealing Day, after the initial issue is the Net Asset Value per Share of the Fund Adjustments may be made to the Net Asset Value per Share as described below.
<b>Available Share Class</b>	Class S Shares
<b>Minimum Initial Investment</b>	The minimum initial investment in Shares is £1,000,000
<b>Minimum Additional Subscription</b>	The minimum amount of additional subscriptions is £100,000. The Directors may waive such minimum initial subscription, minimum holding and minimum additional subscription amounts in their absolute discretion.
<b>Minimum Holding</b>	None
<b>Dealing Deadline</b>	5.00 p.m. (Irish time) on the relevant Dealing Day unless the Directors otherwise agree and in this case provided the application is received before the Valuation Point for the relevant Dealing Day.
<b>Dilution Adjustment</b>	In respect of the Fund, in the event of there being net subscription on any Dealing Day, the Company may make an adjustment to the Net Asset Value per Share of the relevant class to cover stamp duties and taxation (if any) in respect of the issue of Shares, and the costs of restructuring the Fund's portfolio (a Dilution Adjustment). Such an adjustment will not exceed 3% of the Fund's Net Asset Value. The purpose of any such adjustment would be to preserve the value of the underlying assets of the Fund. The Directors reserve the right to waive the Dilution Adjustment at any time. In respect of the Fund, in the event of there being net repurchases on any Dealing Day, the Company may make an adjustment to the Net Asset Value per Share of the relevant class to cover the costs of restructuring the Funds portfolio (a Dilution Adjustment). Such an adjustment will not exceed 3% of the Fund's Net Asset Value. The purpose of such adjustment would be to preserve the value of the underlying assets of the Fund. The Directors reserve the right to waive the Dilution Adjustment at any time.
<b>Settlement Date</b>	Cleared funds must be received and accepted by the Administrator by 5.00pm (Irish time) within four Business Days of the Dealing Day.  In the case of repurchases, proceeds will usually be paid by electronic transfer to a specified account ( <i>in the absence of any other specific instruction</i> ) at the

Shareholder's risk and expense within four Business Days following the Dealing Day after the receipt of the relevant duly signed repurchase documentation.

**Valuation Point**

means 9.00 p.m. Irish time on the relevant Dealing Day and/or such other time as may be determined by the Directors from time to time and notified in advance to all Shareholders provided it is after, or the same time as, the Dealing Deadline for the relevant Dealing Day.

**Fee Cap**

The aggregate expenses of the Fund payable out of the assets of the Fund, including for the amortisation of establishment costs, will not exceed 15 basis points per annum of the Net Asset Value. This will include any fees and expenses payable to each of the Administrator, the Custodian and the Distributor. No investment management fee will be payable out of the assets of the Fund attributable to the Shares. The Sub-Investment Manager's fees and expenses will be paid by the Investment Manager.

There are no preliminary or repurchase or exchange charges.

Fees will be calculated on a daily basis and deducted from the assets of the Fund in accordance with the above provisions on a fortnightly basis.

The Fund will be subject to its proportionate share of any fees and expenses payable by collective investment schemes in which it invests, which will vary from scheme to scheme depending on the nature and investment strategy thereof. It is not intended that the Fund would pay any investment management fee in respect of any investment in a scheme managed by any member of the Insight group.

Details of any other fees and expenses payable out of the assets of the Fund are set out in the Prospectus under the heading "Charges and Expenses".

**Miscellaneous**

There are currently fifty six other funds of the Company in existence namely;
