Further information in relation to CRS can be found on the Automatic Exchange of Information (AEOI) webpage on www.revenue.ie

I/We also warrant and declare that the monies being invested pursuant to the application do not represent directly or indirectly the proceeds of any criminal activity and that the investment is not designed to conceal such proceeds so as to avoid prosecution for an offence or otherwise.
10. I/We agree that the Company collects, stores and uses the data I/we provide in its interactions with me/us. I/We have been advised to read in detail the Privacy Notice in the Appendix and any amendment or supplement thereto. This document provides an outline of my/our data protection rights and my/our data protection obligations as they relate to my/our investment in the Company.
 11. I/We understand that the Company operates a single collections account in the name of the Company through which subscription monies and redemption proceeds and dividend income (if any) for each Fund are channeled. Key Investor Information

The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Absolute Insight Credit Fund: Class Ap2 Sterling Shares
A sub-fund of Absolute Insight Funds plc

ISIN: IE00B3Z9T832

This Fund is managed by Insight Investment Management (Europe) Limited

Objectives and Investment Policy

The Fund aims to produce positive absolute returns, comprising both income and capital growth, in all market conditions on a rolling 12 month basis. The Fund's benchmark is 3 month Libid and the Fund shall measure its performance against this. In addition the Fund seeks to generate returns of up to 3 month Libid + 5% gross of fees over an annualised five year period, whilst being mindful of the 12 month aim.

The Fund seeks to achieve its objective primarily by investment in a broad range of debt (bonds and other debt-related instruments) and derivative instruments.

The Fund invests on a worldwide basis, including emerging markets. It primarily invests in investment grade bonds, high yield bonds, asset-backed securities and loans issued by companies, governments, local authorities and supranational bodies. Up to 50% of the Fund maybe invested in high yield bonds. The Fund will also invest in cash and other cash-like investments. When the Investment Manager cannot identify opportunities likely to produce gains relative to the benchmark, such investment may be significant.

The Investment Manager has a high level of choice as to how to make investments for the Fund and will pursue a number of different strategies

depending upon its views on a number of factors, including the ability of individual debt issuers, or types of issuer to successfully repay their debt and the relative merits of different types of debt.

The Investment Manager will use a wide range of derivative instruments. This will usually be where it believes they offer a more effective way of investing than investing directly (eg in a bond), to hedge (or minimise) market and other risks, or to otherwise take a short position. Taking a short position means selling something the Fund does not own and is a way of still making money when markets are falling. Hedging and short positions are important techniques for producing positive returns in all market conditions.

This Fund may not be appropriate for investors who plan to withdraw their money within five years.

Class Ap2 Sterling Shares do not pay a dividend. Any income arising is retained in the Fund and reflected in the value of the share class. Shares can be bought from and sold back to the Fund on any business day in Ireland.

Please refer to the "Investment Objectives and Policies" section of the Prospectus and Fund Supplement for more detailed information.

Risk and Reward Profile

Lower risk ← Higher risk
Potentially lower reward ← Potentially higher reward

- This indicator is based on historical or simulated data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The Fund is ranked in risk and reward category 3 as whilst it does invest in bonds, emerging markets and currencies, which tend to be more volatile than cash, it uses derivatives to attempt to reduce volatility.

The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations).

Investors may not get back the full amount invested. The Fund is also subject to the following risks which are not included in the calculation of the risk-reward indicator.

While efforts will be made to eliminate potential inequalities between Shareholders through the performance fee calculation methodology,

there may be occasions where a shareholder may pay a performance fee for which they have not received a commensurate benefit.

The Fund may use derivatives for investment purposes. Derivatives are inherently volatile and a small movement in the price of the underlying investment may result in a large impact on the price of the Fund. Whilst the use of derivatives is not intended to cause larger, more frequent changes in the Fund price or increase its risk profile, the Fund may be exposed to additional risks and costs as a result.

The Fund may invest in high yield bonds where there is a greater risk to capital and income than a similar investment in government or investment grade bonds. High yield bonds may also be less liquid. The Fund may hold over 35% of its net asset value in securities of one governmental issuer. The value of the Fund may be profoundly affected if one or more of these issuers fails to meet its obligations or suffers a ratings downgrade.

The Fund may invest in instruments that are priced from a single source and as such this price may not be an accurate reflection of the price that can be achieved when sold.

The Issuer of a debt security held by the Fund may not pay income or repay capital to the Fund when due.

The Fund may invest in instruments which can be difficult to sell when markets are stressed.

Objectives and Investment Policy

The Fund aims to produce positive total returns, comprising both income and capital growth, in all market conditions on a rolling 12 month basis. Absolute Insight Dynamic Opportunities Fund: Class Ap Sterling Shares
A sub-fund of Absolute Insight Funds plc

ISIN: IE00BCKFN763

This Fund is managed by Insight Investment Management (Ireland) Limited

Objectives and Investment Policy

The Fund aims to produce positive total returns, comprising both income and capital growth, in all market conditions on a rolling 12 month basis. In addition, the Fund aims to target at least 3 month Libid + 5% on a rolling annualised 5 year basis gross of fees and expenses. It should be noted that this objective is not guaranteed but rather depends upon the Investment Manager's skill in selecting appropriate investments as described below. The Fund's benchmark is 3 month Libid.

The Fund aims to achieve its objective by investing in a broad range of different types of assets, including shares, bonds, commodities, property and infrastructure. To the extent permitted the Fund may take this exposure directly or through the use of appropriate derivative instruments. The Fund may invest up to 10% in collective investment schemes.

You should note that the Fund invests on a worldwide basis. The Fund may invest in investment grade bonds issued by governments, government agencies or companies. Where a bond is unrated it will be deemed equivalent to investment grade by the Investment Manager. The Fund may allocate up to 20% in sub investment grade bonds.

The Fund will invest in cash and other cash-like investments (including money market instruments) and from time to time such investment may be significant.

The Fund will generally invest by reference to macroeconomic themes (taking views on a whole market) rather than by individual stock picking. The Fund will seek to express these macroeconomic views by using a number of investment strategies in order to achieve its target return.

The Investment Manager will use a wide range of derivative instruments, usually where it believes they offer a more effective way of investing in, or adjusting exposure to a particular asset class, to take short positions, or to otherwise hedge market or currency risk. Taking a short position means selling something the Fund does not own and is a way of still making money when markets fall.

This Fund may not be appropriate for investors who plan to withdraw their money within five years.

Class Ap Sterling Shares do not pay a dividend. Any income arising is retained in the Fund and reflected in the value of the share class.

Shares can be bought from and sold back to the Fund on any business day in Ireland.

Absolute Insight Dynamic Opportunities Fund: Class B1p Sterling Shares
A sub-fund of Absolute Insight Funds plc

ISIN: IE00BCKFNB06

This Fund is managed by Insight Investment Management (Ireland) Limited

Objectives and Investment Policy

The Fund aims to produce positive total returns, comprising both income and capital growth, in all market conditions on a rolling 12 month basis. In addition, the Fund aims to target at least 3 month Libid + 5% on a rolling annualised 5 year basis gross of fees and expenses. It should be noted that this objective is not guaranteed but rather depends upon the Investment Manager's skill in selecting appropriate investments as described below. The Fund's benchmark is 3 month Libid.

The Fund aims to achieve its objective by investing in a broad range of different types of assets, including shares, bonds, commodities, property and infrastructure. To the extent permitted the Fund may take this exposure directly or through the use of appropriate derivative instruments. The Fund may invest up to 10% in collective investment schemes.

You should note that the Fund invests on a worldwide basis. The Fund may invest in investment grade bonds issued by governments, government agencies or companies. Where a bond is unrated it will be deemed equivalent to investment grade by the Investment Manager. The Fund may allocate up to 20% in sub investment grade bonds.

The Fund will invest in cash and other cash-like investments (including money market instruments) and from time to time such investment may be significant.

The Fund will generally invest by reference to macroeconomic themes (taking views on a whole market) rather than by individual stock picking. The Fund will seek to express these macroeconomic views by using a number of investment strategies in order to achieve its target return.

The Investment Manager will use a wide range of derivative instruments, usually where it believes they offer a more effective way of investing in, or adjusting exposure to a particular asset class, to take short positions, or to otherwise hedge market or currency risk. Taking a short position means selling something the Fund does not own and is a way of still making money when markets fall.

This Fund may not be appropriate for investors who plan to withdraw their money within five years.

Class B1p Sterling Shares do not pay a dividend. Any income arising is retained in the Fund and reflected in the value of the share class.

Shares can be bought from and sold back to the Fund on any business day in Ireland.

Please refer to the "Investment Objectives and Policies" section of the Prospectus and Fund Supplement for more detailed information.

Absolute Insight Emerging Market Debt Fund: Class Ap Sterling Shares A sub-fund of Absolute Insight Funds plc

ISIN: IE00B3CLDH95

This Fund is managed by Insight Investment Management (Ireland) Limited

Objectives and Investment Policy

The Fund aims to produce positive total returns, comprising both income and capital growth, in all market conditions on a rolling 12 month basis. In addition, the Fund aims to target at least 3 month Libid + 4% on a rolling annualised 5 year basis gross of fees and expenses. It should be noted that this objective is not guaranteed but rather depends upon the Investment Manager's skill in selecting appropriate investments as described below. The Fund's benchmark is 3 month Libid. The Fund seeks to achieve its objective primarily by investment in a broad range of bonds and derivatives relating to emerging markets. The Fund primarily invests in investment grade and high yield bonds issued by companies, governments or public international bodies. High yield bonds are generally riskier than investment grade bonds, but in return pay more income. The Fund will also invest in cash and other cash-like investments (including money market instruments). When the Investment Manager cannot identify opportunities likely to produce gains relative to the benchmark, such investment may be significant. The Investment Manager has a high level of choice as to how to make investments for the Fund and will pursue a number of different bond- and currency-based emerging market strategies depending upon its views on a number of factors, including likely changes in the creditworthiness of

emerging market bonds, the creditworthiness of particular emerging market bonds relative to other such bonds and the value, or future volatility of, emerging market currencies. The Investment Manager will use a wide range of derivative instruments. This will usually be where it believes they offer a more effective way of investing than investing directly in a bond, to hedge (or minimise) market and other risks or to otherwise take a short position. Taking a short position means selling something the fund does not own and is a way of still making money when markets are falling. Hedging and short positions are important techniques for producing positive returns in all market conditions. This Fund may not be appropriate for investors who plan to withdraw their money within five years. Class Ap Sterling Shares do not pay a dividend. Any income arising is retained in the Fund and reflected in the value of the share class. Shares can be bought from and sold back to the Fund on any business day in Ireland. Risk and Reward Profile

- This indicator is based on historical or simulated data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The Fund is ranked in risk and reward category 3 as whilst it does invest in bonds, emerging markets and currencies, which tend to be more volatile than cash, it uses derivatives to attempt to reduce volatility. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. The Fund is also subject to the following risks which are not included in the calculation of the risk-reward indicator.

While efforts will be made to eliminate potential inequalities between Shareholders through the performance fee calculation methodology,

there may be occasions where a shareholder may pay a performance fee for which they have not received a commensurate benefit. The Fund may use derivatives for investment purposes. Derivatives are inherently volatile and a small movement in the price of the underlying investment may result in a large impact on the price of the Fund. Whilst the use of derivatives is not intended to cause larger, more frequent changes in the Fund price or increase its risk profile, the Fund may be exposed to additional risks and costs as a result. The Fund invests in emerging markets which can be less liquid and riskier than more developed markets and difficulties in accounting, dealing, settlement and custody may arise. The Fund may invest in high yield bonds where there is a greater risk to capital and income than a similar investment in government or investment grade bonds. High yield bonds may also be less liquid. The Fund may hold over 35% of its net asset value in securities of one governmental issuer. The value of the Fund may be profoundly affected if one or more of these issuers fails to meet its obligations or suffers a ratings downgrade. The Issuer of a debt security held by the Fund may not pay income or repay capital to the Fund when due. The Fund may invest in instruments which can be difficult to sell when markets are stressed.

Absolute Insight Equity Market Neutral Fund: Class Ap Sterling Shares
A sub-fund of Absolute Insight Funds plc

ISIN: IE00B39G4X01

This Fund is managed by Insight Investment Management (Ireland) Limited

Objectives and Investment Policy

The Fund aims to produce positive total returns, comprising both income and capital growth, in all market conditions on a rolling 12 month basis. In addition, the Fund aims to target 3 month Libid + 3% on a rolling annualised 5 year basis gross of fees and expenses. It should be noted that this objective is not guaranteed but rather depends upon the Investment Manager's skill in selecting appropriate investments as described below. The Fund's benchmark is 3 month Libid. The Fund seeks to achieve its objective primarily by investment in a broad range of shares of companies traded on stock markets, together with related investments, including derivative instruments. The Fund will have a bias towards UK and European companies. The Fund will also invest in cash and other cash-like investments (including money market instruments) and, bearing in mind the objective of the Fund, from time to time such investment may be significant.

A key feature of the Fund is that it invests in company shares whilst at the same time seeking to hedge (or minimise) the market related risks of doing so.

The Investment Manager will use a wide range of derivative instruments, usually where it believes they offer a more effective way of investing in shares, or to hedge market risk.

The success of the Fund will depend primarily upon the accuracy of the Investment Manager's views of the relative merits of companies. The Investment Manager has a high level of choice as to how to make investments for the Fund. However, when the Investment Manager is not able to identify investment opportunities offering gains relative to the Fund's benchmark, it will instead remain invested in cash and cash-like investments.

This Fund may not be appropriate for investors who plan to withdraw their money within five years.

Class Ap Sterling Shares do not pay a dividend. Any income arising is retained in the Fund and reflected in the value of the share class.

Shares can be bought from and sold back to the Fund on any business day in Ireland.

This Fund is managed by Insight Investment Management (Ireland) Limited

Objectives and Investment Policy

The Fund aims to produce positive total returns, comprising both income and capital growth, in all market conditions on a rolling 12 month basis. In addition, the Fund aims to target 3 month Libid + 3% on a rolling annualised 5 year basis gross of fees and expenses. It should be noted that this objective is not guaranteed but rather depends upon the Investment Manager's skill in selecting appropriate investments as described below. The Fund's benchmark is 3 month Libid.

The Fund seeks to achieve its objective primarily by investment in a broad range of shares of companies traded on stock markets, together with related investments, including derivative instruments. The Fund will have a bias towards UK and European companies. The Fund will also invest in cash and other cash-like investments (including money market instruments) and, bearing in mind the objective of the Fund, from time to time such investment may be significant.

A key feature of the Fund is that it invests in company shares whilst at the same time seeking to hedge (or minimise) the market related risks of doing so.

The Investment Manager will use a wide range of derivative instruments, usually where it believes they offer a more effective way of investing in shares, or to hedge market risk.

The success of the Fund will depend primarily upon the accuracy of the Investment Manager's views of the relative merits of companies. The Investment Manager has a high level of choice as to how to make investments for the Fund. However, when the Investment Manager is not able to identify investment opportunities offering gains relative to the Fund's benchmark, it will instead remain invested in cash and cash-like investments.

This Fund may not be appropriate for investors who plan to withdraw their money within five years.

Class B1p Sterling Shares do not pay a dividend. Any income arising is retained in the Fund and reflected in the value of the Share Class.

Shares can be bought from and sold back to the Fund on any business day in Ireland.

Risk and Reward Profile

Lower risk ← Higher risk
Potentially lower reward Potentially higher reward

- This indicator is based on historical or simulated data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The Fund is ranked in risk and reward category 2 as whilst it does invest in equities, which tend to be more volatile than bonds or indeed cash, it uses derivatives to attempt to reduce volatility.

The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. The Fund is also subject to the following risks which are not included in the calculation of the risk-reward indicator.

While efforts will be made to eliminate potential inequalities between Shareholders through the performance fee calculation methodology, there may be occasions where a shareholder may pay a performance fee for which they have not received a commensurate benefit.

The Fund may use derivatives for investment purposes. Derivatives are inherently volatile and a small movement in the price of the underlying investment may result in a large impact on the price of the Fund. Whilst the use of derivatives is not intended to cause larger, more frequent changes in the Fund price or increase its risk profile, the Fund may be exposed to additional risks and costs as a result.

The Fund may invest in instruments which can be difficult to sell when markets are stressed.
