Fund performance is shown for share class S € Acc (performance start date 05/09/2013) and is calculated as total return, including reinvested income, gross of fees and expenses. Benchmark performance shown is for 1-month ESTER (previously 3-Month EURIBOR until 1st January 2020). Benchmark used is the share class currency equivalent of SONIA. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Performance for periods over one year is annualised. Past performance is not a guide to future performance. ## FUND MANAGER COMMENTS

The Fund underperformed its cash benchmark in April, ending with a weighted average rating of AA. Risk assets succumbed to a severe sell-off, due to tariff announcements. European structured credit had a challenging month. Higher beta classes, including mezzanine residential mortgage-backed securities (MBS), commercial MBS and collateralised loan obligations (CLOs) underperformed, while higher credit assets acted as a relative safe haven. US structured credit was also affected by the market turbulence. Issuance was subdued before picking up towards the end of the month to reach levels below historical averages. AAA rated spreads widened by 20-30bp, while less liquid sectors saw spreads widen by 50-100bp before they slowly retraced. The Fund was active in the secondary market, rotating out of UK prime AAA rated paper into CLOs. The Fund will seek opportunities in US non-qualified and Australian residential MBS.
