LONG DATED BUY AND MAINTAIN FUND

30 September 2019

FUND OBJECTIVE

The Fund seeks to generate a return for investors by investing primarily in a portfolio of debt securities

FUND SUMMARY

- Actively managed to aim to deliver an attractive absolute return through a long-term low turnover investment approach, targeting bonds with a maturity of over 10 years
- Aims to add value principally through attractive credits, continually managed to reflect Insight's credit views
- Aims to avoid flaws of a market-weight based benchmark approach, such as limiting unwanted concentration or bias towards most indebted issuers
- Rigorous, disciplined investment process drawing on a large team of credit analysts

SHARE CLASS PERFORMANCE

Source: Insight Investment and Rimes. Fund performance is shown for share class S £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark measure shown is for the iBoxx GBP Corporate & Collateralised over 10 year ex-T1 & UT2, 1.5% issuer cap, 25% level 3 sector cap Index, which has been used as a comparator for performance purposes. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

FUND MANAGER COMMENTS

The Fund and longer-dated corporate bonds more broadly posted positive returns over the quarter driven by another substantial fall in underlying Gilt yields. Credit spreads traded sideways, generating little additional gains above government bonds. The Fund underperformed its comparator index. This was predominantly driven by Intu failing to participate in the broader rally leaving market pricing below our expectations of recovery value – hence we continue to hold. We did, however, switch Intu exposure from bonds backed by weaker collateral into Intu (SGS) bonds that are secured against a broader and higher quality portfolio of assets for a modest pick-up in spread. Over the quarter the fund participated in new issuance from insurer Royal London and a securitisation of the Westfield Stratford shopping centre on very attractive terms and covenants. There were no sales due to credit concerns.
