UK CORPORATE ALL MATURITIES BOND FUND

30 September 2019

FUND OBJECTIVE

The Fund aims to generate a return by investing principally in sterling denominated fixed interest securities issued by entities other than the UK government

FUND SUMMARY

- Actively managed to aim to deliver attractive total returns in excess of a credit benchmark
- Aims to add value principally through credit strategy, security selection, duration and currency management and off-benchmark exposures across global fixed income
- Invests primarily in fixed income securities and currencies, either directly or via derivatives
- Rigorous, disciplined investment process drawing on a large team of fixed income and currency specialists

SHARE CLASS PERFORMANCE

Source: Insight Investment and Rimes. Fund performance is shown for share class S £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

FUND MANAGER COMMENTS

The Fund delivered a positive return but slightly underperformed its benchmark. In July, credit strategy was negative due to overweights in fixed-rate securitisations and subordinated financials; security selection was also negative, primarily due to an overweight position in Intu, which published worse-than-expected results. However, the allocation to euro-denominated bonds was positive for returns. In August, Intu was again the main detractor – with bonds pricing well below our expectation of recovery value we continued to hold. General Electric also detracted after a well-publicised research note issued by a short seller, and our small overweight to credit risk was negative as spreads widened. The Fund recovered performance in September as the Intu bonds rebounded, and other UK names performed well in the wake of improved sentiment over Brexit. A new issue from Rothesay Life also performed well, benefiting the portfolio.
