

# HIGH GRADE ABS

31 December 2025

## FUND OBJECTIVE

The Fund seeks to produce an interest rate based return, primarily through investment in a portfolio of asset-backed securities (ABS) and corporate floating rate notes (FRNs)

## FUND SUMMARY

- Actively managed to aim to deliver positive absolute returns in excess of a cash benchmark
- Aims to add value principally through AAA and AA rated securities, with a bias to prime residential mortgage-backed securities
- Rigorous, disciplined investment process aiming to deliver precision and diversification
- The Fund was previously named the LIBOR Plus Fund. It was renamed the High Grade ABS Fund on 2 January 2020.

Source: Insight Investment and Rimes. Fund performance is shown for share class S € Acc (performance start date 05/09/2013) and is calculated as total return, including reinvested income, gross of fees and expenses. Benchmark performance shown is for 1-month €STR (previously 3-Month EURIBOR until 1st January 2020). Benchmark used is the share class currency equivalent of SONIA. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Performance for periods over one year is annualised. Past performance is not a guide to future performance. Please note the value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. Investors must read all performance information alongside the full performance information in the KIID.

## FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in December, ending with a weighted average rating of AA+. Risk assets posted gains due to moderating inflation and easing monetary policies. European structured credit performed well in December, while issuance was subdued in line with the seasonal pattern. US structured credit saw spreads tighten, with automotive loans outperforming credit card asset-backed securities, reflecting investor preference for shorter-duration, higher-quality assets. Issuance was limited, while the continued bifurcation between higher- and lower-quality collateral pools was evident. Over the month, the Fund focused on the secondary market, adding liquid AAA-rated UK prime residential mortgage-backed securities and AA-rated European collateralised loan obligations. The outperformance was driven by spread tightening.
