Source: Insight Investment and Rimes. All performance is annualised. Fund performance is shown for share class S € Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Benchmark performance shown is for 1-month ESTER (previously 3-Month EURIBOR until 1st January 2020). Benchmark used is the share class currency equivalent of SONIA. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in October, ending with a weighted average rating of single A. Risk assets sold off, due to concerns around rates remaining higher for longer. European structured credit was primarily driven by carry, as higher beta classes and the top end of the capital structure outperformed. Senior asset-backed securities (ABS) offered attractive features during times of stress. Investors absorbed robust broad-based supply across sectors and jurisdictions. Spreads widened within US structured credit, against weakened demand, rate volatility and macroeconomic concerns, only to stabilise after data revealed robust consumer spending. New issuance was strong. Tighter conditions will affect consumers, but ABS structures remain insulated. Performance was driven by carry. The Fund continued its migration toward a single A portfolio rating, rotating out of senior tranches into mezzanine instruments in Australia and the US.
