Source: Insight Investment and Rimes. All performance is annualised. Fund performance is shown for share class S € Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Benchmark performance shown is for 1-month €STR (previously 3-Month EURIBOR until 1st January 2020). 1-month €STR is interpreted as the cumulative return of daily €STR over the previous month. Benchmark used is the share class currency equivalent of SONIA. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

## FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in January, ending with a weighted average rating of single A. Risk assets strengthened. European structured credit performed well in January, despite broader macroeconomic and geopolitical uncertainties, as it was supported by strong underlying credit fundamentals and favourable technical conditions. US structured credit saw spreads tighten, against strong demand, underscoring continued institutional willingness to allocate capital to shorter-duration credit within diversified fixed-income portfolios. New issuance was slightly below last year's level. However, secondary market activity strengthened, as average daily trading volumes rose by more than 20%. The Fund was very active in the primary and secondary markets, realising profit and rotating into assets that fit the return profile. Fund performance was driven by capital appreciation and carry.
