Source: Insight Investment and Rimes. Fund performance is shown for share class S € Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. The Fund's base currency changed from GBP to EUR on 29 November 2019. Prior to 29 November 2019, Fund performance was shown for a GBP share class and from 29 November 2019 it has been shown for a EUR share class. As a result, the Fund's performance prior to 29 November 2019 has been converted to EUR. Therefore the performance shown will differ with the actual performance experienced in the GBP share class.

FUND MANAGER COMMENTS

In February, the Fund posted further gains, outperforming the cash benchmark and the CS Western European Institutional Loan Index on a month-to-date and year-to-date basis. Leveraged loans were buoyed by a strong technical backdrop and a rapidly rising forward curve. The index's default ratio decreased to 0.2%, while the distress ratio fell from 4.95% to 3.89%. Issuance reached €2.50 billion in February. We participated in one deal in the primary market, a dividend recap from a sustainable packaging company, Eviosys, trading an existing term loan from the same company that offered a lower yield. An improved growth outlook and strong fundamentals have led to a downward revision of default expectations. We continue to focus on security selection, particularly as downside risks are set to increase. Rising coupons and capital gains should support our returns. In our view, leveraged loans are well placed to compensate for credit risk and now offer select investment opportunities.
