Source: Insight Investment and Rimes. Fund performance is shown for share class B € Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for 3 Month Euribor. Benchmark used is the shareclass currency equivalent of SONIA. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

## FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in January. Risk assets experienced volatility, as investors priced in the prospect of delayed rate cuts from central banks. However, equities and credit ended the month higher. European structured credit performed well. Higher beta classes outperformed again. In addition, junior tranches, especially BBB-rated assets, also posted strong gains. Investors absorbed robust supply across several sectors and jurisdictions, with notable volume observed in collateralised loan obligations (CLOs). US structured credit also posted gains, against record issuance and very strong investor demand. Many deals were 5-10 times oversubscribed. In the secondary market, spreads notably tightened in investment grade A and BBB rated paper and within the subprime automotive sector. January was quiet on the lending side. Performance was broad-based, with broadly syndicated and middle market CLOs and commercial mortgage-backed securities contributing most strongly.
