Source: Insight Investment and Rimes. Fund performance is shown for share class S € Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Benchmark performance shown is for 1-month ESTER (previously 3-Month EURIBOR until 1st January 2020). Benchmark used is the share class currency equivalent of SONIA. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. Investors must read all performance information alongside the full performance information in the KIID.

FUND CHARACTERISTICS

FUND MANAGER COMMENTS

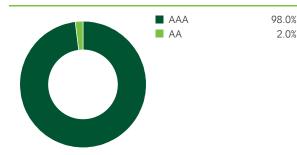

The Fund outperformed its cash benchmark in January, ending with a 98% weighting to AAA rated assets. Risk assets experienced volatility, as investors priced in delayed rate cuts. European structured credit performed well. Higher beta classes outperformed. Nonconforming (NC) UK residential mortgage-backed securities (RMBS) also posted gains. Investors absorbed robust supply across several sectors and jurisdictions, with notable volume observed in collateralised loan obligations. We observed several UK prime issuers come back to the market. US structured credit performed well, against record issuance and very strong investor demand. Many deals were 5-10 times oversubscribed. In the secondary market, spreads notably tightened in investment grade A and BBB rated paper and within the subprime automotive sector. Over the month, performance was broad-based, with prime RMBS and commercial MBS contributing most strongly.
