Source: Insight Investment and Rimes. Fund performance is shown for share class S € Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Benchmark performance shown is for 1-month ESTER (previously 3-Month EURIBOR until 1st January 2020). Benchmark used is the share class currency equivalent of SONIA. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. Investors must read all performance information alongside the full performance information in the KIID.

FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in March, ending with a 98% weighting to AAA rated assets. Risk assets posted gains. European structured credit performed well. Despite elevated valuations, relative value versus corporate credit remains attractive, but the prospects of tightening have diminished. Issuance was robust, led by residential mortgage-backed securities (RMBS) and collateralised loan obligations. The best-performing assets remain within the bottom tranches of investment grade. US structured credit posted gains, against elevated issuance and strong demand. Spread tightening in AAA rated assets was marginal, while spreads within mezzanine paper tightened more meaningfully. In our view, investor demand and attractive relative value should lead to further tightening, especially in esoteric sectors. Performance was driven by carry and spread tightening within Australian RMBS.
