Source: Insight Investment and Rimes. Fund performance is shown for share class S € Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Benchmark performance shown is for 1-month ESTER (previously 3-Month EURIBOR until 1st January 2020). Benchmark used is the share class currency equivalent of SONIA. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. Investors must read all performance information alongside the full performance information in the KIID.

## **FUND MANAGER COMMENTS**

The Fund outperformed its cash benchmark in January, ending with an average rating of AAA. Risk assets were strong, despite disruptive announcements affecting investor sentiment. European credit performed well across the capital structure. Collateralised loan obligations and other areas where spreads remained wide on a historical basis outperformed. Issuance picked up mid-month to deliver broad-based supply across sectors and jurisdictions. US structured credit saw robust issuance and incredibly strong demand, especially further out on the curve, where the combination of elevated yields and wider spreads resulted in higher all-in yields. In the secondary markets, spreads tightened by 5-15bp. The Fund was active in the primary and secondary markets, reinvesting principal receipts across a range of assets. The Fund continued to add short duration securities in sectors with an attractive risk-return profile on a relative value basis.
