Source: Insight Investment and Rimes. Fund performance is shown for share class S € Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Benchmark performance shown is for 1-month ESTER (previously 3-Month EURIBOR until 1st January 2020). Benchmark used is the share class currency equivalent of SONIA. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. Investors must read all performance information alongside the full performance information in the KIID.

FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in May, ending an average rating of AAA. Risk assets rallied, led by US equities, as trade tensions eased. In contrast, bond yields rose after Moody's downgraded the US sovereign credit rating. European structured credit saw sharp spread tightening, despite robust issuance, as the asset class was buoyed by improved investor sentiment and significant capital deployment. US structured credit saw a recovery in primary issuance against strong demand. In May, benchmark sectors tightened by 10 bp, while higher beta sectors tightened by 20–30 bp. In May, the Fund was active in the primary market, buying asset classes spanning different sectors and geographies on a relative value basis, with a focus on US non-qualified residential mortgage-backed securities (RMBS) and Australian short-dated RMBS, where we see an attractive risk-return profile
