Source: Insight Investment and Rimes. Fund performance is shown for share class S € Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Benchmark performance shown is for 1-month €STR (previously 3-Month EURIBOR until 1st January 2020). Benchmark used is the share class currency equivalent of SONIA. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. Investors must read all performance information alongside the full performance information in the KIID.

FUND MANAGER COMMENTS

The Fund underperformed its cash benchmark in November, ending with an average rating of AAA. Risk assets were affected by uncertainty around the path of monetary policy across Europe, the US and the UK. European structured credit saw robust primary issuance and strong investor demand. The secondary market was initially quiet, but investors deployed capital towards the end of the month in anticipation of subdued issuance in December. US structured credit was resilient, with investors focusing on higher-quality assets. In November, the Fund reinvested amortisation and inflows, mainly in the primary market, into a range of assets, with a focus on short-term AAA rated paper in Australia and UK consumer and residential mortgage-backed securities. Over the month, the outperformance was driven by spread tightening.
