SHARE CLASS PERFORMANCE (S £ Acc share class)

Source: Insight Investment and Rimes. Fund performance is shown for share class S £ Acc which was launched on 7 March 2013 and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for 3 Month Sterling Libor. Past performance is not indicative of future results. Investment in any strategy involves a risk of loss which may partly be due to exchange rate fluctuations.

FUND MANAGER COMMENTS

The Fund delivered a negative return, underperforming its cash benchmark. Country allocation was the main negative mainly due to our long US versus short German position as German bunds benefitted from the European Central Bank's (ECB) signal that further easing and a new asset purchase programme are likely in the next months. Duration was also negative mainly due to our short position in Italian bonds, which also rallied on dovish ECB rhetoric. Yield curve positioning was also a negative for performance. Inflation positioning was positive as our 30-year US Treasury Inflation-Protected Securities 'breakeven' position slightly recovered some of last month's losses. In credit, investment grade benefitted from some spread tightening, and our small net long duration position in emerging market debt was also positive. Asset-backed securities, high yield, and loans were neutral. Currency was small positive.
