

BONDS PLUS FUND

30 November 2021

FUND OBJECTIVE

The Fund aims to deliver positive absolute returns on an annual basis

FUND SUMMARY

- Actively managed to aim to deliver positive absolute returns in excess of a cash benchmark
- Invests primarily in fixed income securities and currencies, either directly or via derivatives, to express views on the direction of global bond and currency markets.
- Seeks to add value through a diversified portfolio incorporating positions in global bond and currency markets; aims to achieve attractive risk-adjusted returns in all market conditions.
- Rigorous and disciplined investment process bringing together the 'best ideas' from a large team of fixed income and currency specialists.

FUND FACTS

Fund size: £1.4bn

Inception date: 1 September 2006

Benchmark: SONIA

Fund manager: Peter Bentley; Gareth Colesmith; Shaun Casey

Target return: Outperform benchmark by 2% pa (before tax, fees and expenses) over rolling three year periods. However, a positive return is not guaranteed and a capital loss may occur.

Source: Insight Investment and Rimes. Fund performance is shown for share class \$ £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for 1-month SONIA (previously 3-month GBP LIBOR until 31st December 2020). Performance for periods over one year is annualised. Past performance is not indicative of future results. Investment in any strategy involves a risk of loss which may partly be due to exchange rate fluctuations.

FUND MANAGER COMMENTS

The Fund generated a negative return over the month, underperforming its benchmark. The emergence of Omicron COVID-19 caused lower risk-free rates, flatter yield curves and weakness in risk markets. The Federal Reserve's rhetoric became more hawkish on rising inflation. Interest rate positioning detracted. Duration was the main negative due to having short positions in 10-year Gilts and 10-year US Treasuries but long positions in 30-year German Bunds and 10- and 30-year Chinese government bonds helped. The Fund's yield curve positioning detracted given steepening positions in German Bunds and US Treasuries. Country selection was positive given long positions in 10-year Australian government bonds versus US Treasuries plus 5-year German Bunds versus 5-year US Treasuries. Credit positioning was slightly positive. Our corporate credit allocation was largely neutral but asset-backed securities and loans generated income. Emerging markets detracted but currency positioning was positive.
