

# BROAD OPPORTUNITIES FUND

30 April 2019

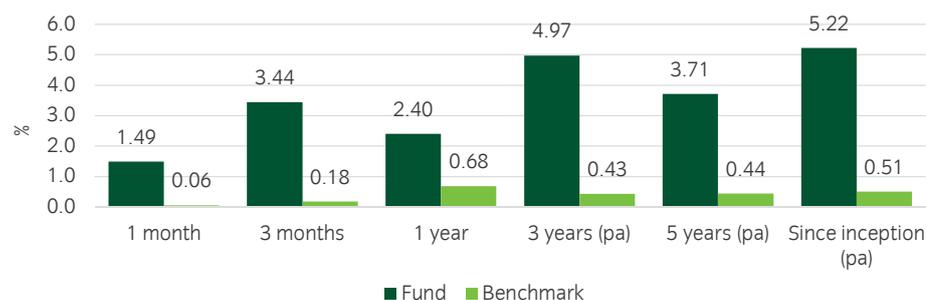

## FUND OBJECTIVE

The Fund aims to deliver attractive positive long-term returns

## FUND SUMMARY

- Based on core principles of diversification, dynamic asset allocation and downside risk management
- Combines actively managed directional risk (aiming to make money when markets go up) with actively managed less directional sources of return (aiming to make money whether markets go up or down)
- Exposure to equity, fixed income, real assets, total return strategies and cash
- Managed by a highly experienced team, with a transparent investment process and proven track record

## SHARE CLASS PERFORMANCE (B1 £ Acc share class)

**Past performance is not indicative of future results. Investment in any strategy involves a risk of loss which may partly be due to exchange rate fluctuations.**

The performance results shown, whether net or gross of investment management fees, reflect the reinvestment of dividends and/or income and other earnings. Any gross of fees performance does not include fees and charges and these can have a material detrimental effect on the performance of an investment.

Source: Insight Investment and Rimes. Fund performance is shown for share class B1 £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for the 3 Month Sterling Libid. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

## FUND MANAGER COMMENTS

April was a constructive month for risk assets, with broad based gains across global equity markets. Against this backdrop, our broad equity exposures and positions designed to capture upside in US, Eurozone and Japanese equity markets drove a strong positive overall return. Given the extent of the rally, there was a negative contribution from positions designed to benefit from range-bound moves in a number of equity markets. We anticipate that risk assets will remain range-bound in the near term and added positions in Eurozone and UK equities that would benefit from such an environment. Government bond exposures and positions designed to benefit from a flattening in US and German government yield curves detracted slightly as yields rose from their lows, but tighter credit spreads led to a positive contribution from high yield and investment grade credit. Within real assets, infrastructure holdings were buoyed by a recovery in aviation finance and social infrastructure.

## FUND FACTS

**Fund size:** £4.4bn

**Inception date:** 7 September 2009

**Benchmark:** 3 Month Sterling Libid
