

BROAD OPPORTUNITIES FUND

31 March 2022

FUND OBJECTIVE

The Fund aims to deliver attractive positive long-term returns

FUND SUMMARY

- Based on core principles of diversification, dynamic asset allocation and downside risk management
- Combines actively managed directional risk (aiming to make money when markets go up) with actively managed less directional sources of return (aiming to make money whether markets go up or down)
- Exposure to equity, fixed income, real assets, total return strategies and cash
- Managed by a highly experienced team, with a transparent investment process and proven track record

Past performance is not indicative of future results. Investment in any strategy involves a risk of loss which may partly be due to exchange rate fluctuations. The performance results shown, whether net or gross of investment management fees, reflect the reinvestment of dividends and/or income and other earnings. Any gross of fees performance does not include fees and charges and these can have a material detrimental effect on the performance of an investment.

Source: Insight Investment and Rimes. Fund performance is shown for share class B1 £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for SONIA 90 days compounded (previously 3 Month Sterling Libid until 1 October 2021). Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. Investors must read all performance information alongside the full performance information in the KIID.

FUND MANAGER COMMENTS

After a challenging start to the year, risks assets stabilised and recovered some lost ground in March, helping the portfolio generate a positive return. Our US and Asian equity holdings made notable gains, as did option-based positions targeting gains in US equities and a sideways move in European markets. Government bonds detracted from performance as yields moved upwards in anticipation of tighter central bank policy, but our small position limited losses. Credit spreads tightened, benefiting our high yield and emerging market debt positions but the diversifying relative value currency positions that we added in recent months gave back some profits. Both our infrastructure holdings and commodities exposure performed well. We reduced our commodity exposure following a period of very strong gains and added to our equity positions. We also added a number of option positions designed to benefit from a sideways move in US and UK equity markets, and upside in Japanese equities.
