

LONG DATED BUY AND MAINTAIN FUND

31 March 2021

FUND OBJECTIVE

The Fund seeks to generate a return for investors by investing primarily in a portfolio of debt securities

FUND SUMMARY

- Actively managed to aim to deliver an attractive absolute return through a long-term low turnover investment approach, targeting bonds with a maturity of over 10 years
- Aims to add value principally through attractive credits, continually managed to reflect Insight's credit views
- Aims to avoid flaws of a market-weight based benchmark approach, such as limiting unwanted concentration or bias towards most indebted issuers
- Rigorous, disciplined investment process drawing on a large team of credit analysts

Source: Insight Investment and Rimes. Fund performance is shown for share class S £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark measure shown is for the iBoxx GBP Corporate & Collateralised over 10 year ex-T1 & UT2, 1.5% issuer cap, 25% level 3 sector cap Index, which has been used as a comparator for performance purposes. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

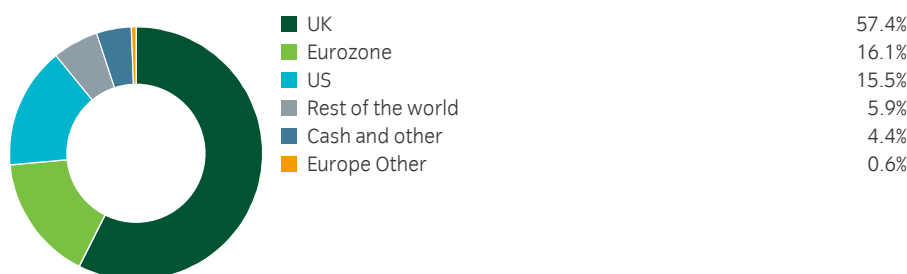

FUND MANAGER COMMENTS

The quarter saw a material rise in global government bond yields, resulting in negative total returns across the maturity spectrum. Credit spreads proved resilient to this move, with longer dated levels ending the quarter largely unchanged. Within credit the more defensive parts of the market underperformed whilst we saw further spread compression in issuers and sectors that had been more acutely exposed to the impact of lockdowns. This divergence contributed towards the Fund outperforming its comparator index with energy firms, US car rental company Enterprise and property securitisations all benefitting from the continued improvement in sentiment. During the quarter the Fund rotated out of issuers acutely exposed to climate change where we felt the market was not adequately pricing the risks we had identified, such as Exxon Mobil and certain US utilities. Proceeds were reinvested into issuers with better climate risk profiles or attractively priced new issuance.
