Source: Insight Investment and Rimes. All performance is annualised. Fund performance is unit price performance and is calculated in Sterling as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for 1-month SONIA (previously 3-Month GBP LIBOR until 1st January 2020). Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in August, ending the month with a running yield of 162bp ahead of one-month sterling SONIA and a 40% weighting to cash and AAA-rated assets. It was a much quieter month for risk assets as is seasonally typical. The European structured credit market performed well with a broad-based tightening of spreads given a subdued primary market and a secondary market which is very light on the offer side. There was a slowdown in the primary market but there is a reasonable new issue pipeline building. The US structured credit market also performed well with continued outperformance in the highest yielding parts of the market. In consumer asset-backed securities, student loan ABS performed well. Collateralised loan obligations were relatively range-bound. The long-term strategic value of the asset class remains strong: the holdings are all highly rated; the market has a supply/demand imbalance; and forecast returns are relatively attractive.
