

# GLOBAL ABS

31 March 2022

## FUND OBJECTIVE

The Fund seeks to produce a return for shareholders, generated from income and capital appreciation

## FUND SUMMARY

- Actively managed to aim to deliver positive absolute returns in excess of a cash benchmark
- Aims to add value principally through A rated securities
- Invests with a bias to global opportunities senior in the capital structure
- Rigorous, disciplined investment process aiming to deliver precision and diversification
- Please note that with effect from 29 October 2021, a temporary stop has been placed on subscriptions from new shareholders to the Global ABS Fund. A maximum additional subscription of 5 million per existing shareholder applies at any daily dealing window. Please contact your Insight relationship manager for further information.

Source: Insight Investment and Rimes. All performance is annualised. Fund performance is unit price performance and is calculated in Sterling as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for 1-month SONIA (previously 3-Month GBP LIBOR until 1st January 2020). Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

## FUND MANAGER COMMENTS

The Fund underperformed its cash benchmark in March, ending the month with a running yield of 170bp ahead of one-month sterling SONIA and a 43% weighting to cash and AAA-rated assets. The European structured credit market, which had been until now one of credit's outperformers, saw a difficult month as the whole capital structure widened and steepened. However, technical conditions are robust given a lack of material issuance while fundamentals remain sound. It was a subdued month for issuance. US structured credit spreads widened as negative technicals (due to both higher short-term interest rates and primary supply) offset positive fundamentals. Issuers should return to the public markets after adjusting to wider spreads. Performance was driven by a broad-based widening of spreads. The long-term strategic value of the asset class remains strong: the holdings are all highly rated; the market has a supply/demand imbalance; and forecast returns are relatively attractive.

## CREDIT RATING
