## FUND SUMMARY

- Actively managed to aim to deliver security, liquidity and attractive cash yields comparable to short-dated money market interest rates
- Daily liquidity with one day's notice
- Aims to add value with money market instruments collateralised by UK gilts, with counterparties including PPF eligible pension schemes as well as banks
- Fitch rated AA Af/S1

## SHARE CLASS PERFORMANCE

Source: Insight Investment and Rimes. All performance is annualised. Fund performance is shown for share class 3 and is calculated in Sterling as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. The CNAV Insight Liquidity Funds are investment funds and not banking products and whilst preservation of capital is a major component of the objective of the funds it is not guaranteed. Neither Insight nor any other BNYM group company will provide capital support for the CNAV Insight Liquidity Funds in the event of any capital loss arising within the funds. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. Please note: data is provisional and may change.

## FUND MANAGER COMMENTS

Brexit negotiations continued in March as MPs voted to extend the Article 50 deadline to 12 April and voted down the Prime Minister's withdrawal agreement twice. A series of 'indicative votes' (alternative propositions to Brexit) were held but none managed to secure a majority. The Bank of England made no changes to the benchmark rate and reiterated that the economic outlook depends on the nature and timing of Brexit. Against this backdrop, 1-month and 3-month sterling Libor rates were unchanged at 0.73% and 0.85%, respectively. In gilt markets, 2-year gilt yields decreased from 0.83% to 0.64%, and 5-year gilt yields decreased from 1.02% to 0.76%. Activity focused on short-dated gilt repos with maturities out to 3 months. The weighted average maturity of the Fund decreased from 37 days in February to 34 days by March month-end.
