Fund performance is shown for share class 3 and is calculated in Sterling as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for SONIA (previously 7-day GBP LIBID until 1st October 2020). The Public Debt CNAV Insight Liquidity Funds are investment funds and not banking products and whilst preservation of capital is a major component of the objective of the funds it is not guaranteed. Neither Insight nor any other BNYM group company will provide capital support for the Public Debt CNAV Insight Liquidity Funds in the event of any capital loss arising within the funds. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). FUND MANAGER COMMENTS

At its August meeting, the Bank of England voted to leave monetary policy unchanged but said that a modest tightening will occur in the next two years if the recovery continues. GDP growth was 4.8% in the second quarter, preventing a re-entry into a double-dip recession. Meanwhile, annual consumer price inflation (CPI) fell to 2% over July, marking the end of a four-period streak of rising inflation. Retail sales fell 2.5% month-on-month in July, missing investor expectations. In markets, 1-month sterling LIBOR was flat at 0.05% in August, while the 3-month rate was flat at 0.07%. In gilt markets, 2-year gilt yields rose from 0.05% to 0.14%, while 5-year gilt yields increased from 0.26% to 0.43%. With interest rates set to remain at ultra-low levels for the foreseeable future (unless the recent rise in inflation is sustained), fund activity was limited to very short-dated assets. The weighted average maturity of the Fund was 31 days at the end of July and 26 days at the end of August.
