FUND MANAGER COMMENTS

The Bank of England (BoE) increased its key Bank Rate from 0.50% to 0.75% during March, driven by continued concerns around inflation. This was the first time the BoE had carried out three consecutive interest rate hikes since 1997. At the same time, the U.K.'s annual inflation rate was reported to have risen from 5.5% in January to 6.2% during February. In markets, the SONIA rate rose from 0.45% at the start of March to 0.69% at the end of the month after the BOE rate rise of 25bp. In gilt markets, the 2-year yield rose from 1.03% to 1.35% and the 5-year yield increased from 1.04% to 1.42%. With the increased expectation of rate rises, fund activity was focused on positioning for central bank meetings. The weighted average maturity of the Fund was 21 days at the end of February and 26 days at the end of March.
