

# HIGH GRADE ABS

30 November 2021

## FUND OBJECTIVE

The Fund seeks to produce an interest rate based return, primarily through investment in a portfolio of asset-backed securities (ABS) and corporate floating rate notes (FRNs)

## FUND SUMMARY

- Actively managed to aim to deliver positive absolute returns in excess of a cash benchmark
- Aims to add value principally through AAA and AA rated securities, with a bias to prime residential mortgage-backed securities
- Rigorous, disciplined investment process aiming to deliver precision and diversification
- The Fund was previously named the LIBOR Plus Fund. It was renamed the High Grade ABS Fund on 2 January 2020.

## FUND FACTS

**Fund size:** £6.9bn

**Inception date:** 31 March 2011

**Benchmark:** 1 Month SONIA

**Fund managers:** Shaheer Guirguis, Jeremy Deacon

Source: Insight Investment and Rimes. Fund performance is shown for share class S £ Acc (performance start date 31/03/2011) and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for 1-month SONIA (previously 3-Month GBP LIBOR until 1st January 2020). Performance for periods over one year is annualised. Past performance is not a guide to future performance. Please note the value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

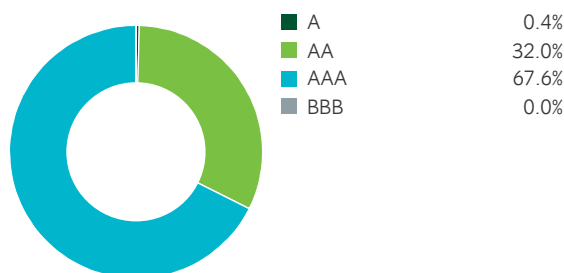

## FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in November, ending with a running yield of 117bp ahead of one-month sterling SONIA and a 68% weighting to AAA-rated assets. It was a volatile month for risk assets with the emergence of the Omicron variant causing a sharp reversal in risk sentiment. The European structured credit market was bumpier, similar to broader credit, with marginal weakness in the more well-supplied areas. However, spread widening was very modest. There was, though, some weakness in the more credit-orientated asset classes. There were reasonable levels of issuance in both the European and Australian asset-backed securities (ABS) markets. The US structured credit market also saw some marginal weakness. There was sustained issuance from several areas, especially the esoteric ABS market. Activity was focused on adding risk in the collateralised loan obligation market, while performance was driven by income. The long-term strategic value of the asset class remains strong.
