Source: Insight Investment and Rimes. All performance is annualised. Fund performance is shown for share class 2 and is calculated in Euro as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. The VNAV Insight Liquidity Funds are investment funds and not banking products and whilst preservation of capital is a major component of the objective of the funds it is not guaranteed. Neither Insight nor any other BNYM group company will provide capital support for the CNAV Insight Liquidity Funds in the event of any capital loss arising within the funds. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. Please note: data is provisional and may change.

FUND MANAGER COMMENTS

The European Central Bank's July meeting minutes showed a significant debate took place over policy guidance, which was altered several times to address the concerns of inflation-averse policymakers while avoiding signals of premature policy tightening. Second estimates confirmed a 2% expansion in GDP over the second quarter. Eurozone CPI was reported at a near 10-year high of 3% in August, up from 2.2% in July, with the rise driven by higher energy prices. The eurozone purchasing managers' index fell for the second consecutive month; the measure now sits at a six-month low of 61.4. In markets, 1-month EURIBOR was unchanged at -0.56% over August, while the 3-month rate fell from -0.54% to -0.55%. With interest rates set to remain at ultra-low levels for the foreseeable future (unless the recent rise in inflation is sustained), fund activity was limited to very short-dated assets. The weighted average maturity of the Fund was 93 days at the end of July and 78 days at the end of August.
