Source: Insight Investment and Rimes. All performance is annualised. Fund performance is shown for share class 2 and is calculated in Euro as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. The VNAV Insight Liquidity Funds are investment funds and not banking products and whilst preservation of capital is a major component of the objective of the funds it is not guaranteed. Neither Insight nor any other BNYM group company will provide capital support for the CNAV Insight Liquidity Funds in the event of any capital loss arising within the funds. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. Please note: data is provisional and may change.

FUND MANAGER COMMENTS

Despite persistently high inflation, the European Central Bank (ECB) reiterated that the rise in prices would be temporary so made no changes to interest rates. The bank did, however, acknowledge that "higher for longer" inflation could not be ruled out. While it repeated that purchases under its Pandemic Emergency Purchase Programme would be discontinued by the end of March, it maintained a rise in interest rates this year is unlikely as policy support was still needed. Meanwhile, the annual eurozone inflation rate rose from 4.9% in November to 5% during December. In markets, 1-month EURIBOR increased from -0.58% in December to -0.57% in January, while the 3-month rate rose from -0.57% to -0.55%. We added certificates of deposit and commercial paper from SAGESSE. We added floating-rate notes from Santander. The weighted average maturity of the Fund was 62 days at the end of December and 57 days at the end of January.
