## SHARE CLASS PERFORMANCE - All performance is annualised

Source: Insight Investment and Rimes. All performance is annualised. Fund performance is unit price performance and is calculated in Sterling as total return, including reinvested income, gross of fees and expenses. Past performance is not indicative of future results. Investment in any strategy involves a risk of loss which may partly be due to exchange rate fluctuations. Any gross of fees performance does not include fees and charges and these can have a material detrimental effect on the performance of an investment. Please note: data is provisional and may change.

## FUND MANAGER COMMENTS

Due to lockdown restrictions, public sector debt rose to 100.8% of GDP, the highest level since the 1960s. The Bank of England issued a stark warning on the economy - the latest lockdown is projected to result in GDP shrinking by 11% in 2020, compared with the previous estimate in August of 5.4%. The asset-purchasing programme was increased by £150bn. The central bank kept the Bank Rate at 0.1%, but a move into negative territory is still being considered. In markets, 1-month sterling LIBOR was flat at 0.04% over November, while the 3-month rate remained at 0.05%. In gilt markets, 2-year gilt yields rose from -0.03% to -0.02%, while 5-year gilt yields increased from -0.04% to 0.01%. We added certificates of deposit and commercial paper from Credit Suisse. We added floating rate notes from the European Bank for Reconstruction and Development and bonds from Swedbank. The weighted average maturity of the Fund was 95 days at the end of October and 86 days at the end of November.
