Source: Insight Investment and Rimes. All performance is annualised. Fund performance is shown for share class 3 and is calculated in US dollars as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for EFFR (previously 7-day USD LIBID until 1st October 2020). Past performance is not a guide to future performance. Please note the value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. Please note: data is provisional and may change.

## FUND MANAGER COMMENTS

Following its December meeting, the US Federal Reserve (Fed) said that in response to rising inflation, it would end its pandemic-related asset purchase programme by March 2022. It also predicted that it would carry out three interest rate hikes by the end of 2022 and upwardly revised its 2022 inflation forecast from 2.2% to 2.6%. The US's annual rate of inflation, driven by continued upward pressure from energy costs, rose to 6.8% during November, which was in line with expectations but the highest rate since 1982. In markets, 1-month US dollar LIBOR rose from 0.09% in November to 0.10% in December, while the 3-month rate increased from 0.17% to 0.21%. With interest rates set to remain low for now (unless the recent rise in inflation is sustained), fund activity was limited to very short-dated assets. The weighted average maturity of the Fund was 25 days at the end of November and 21 days at the end of December.
