

LIBOR PLUS FUND

31 May 2019

FUND OBJECTIVE

The Fund seeks to produce an interest rate based return, primarily through investment in a portfolio of asset-backed securities (ABS) and corporate floating rate notes (FRNs)

FUND SUMMARY

- Actively managed to aim to deliver positive absolute returns in excess of a cash benchmark
- Aims to add value principally through AAA and AA rated securities, with a bias to prime residential mortgage-backed securities
- Rigorous, disciplined investment process aiming to deliver precision and diversification
- Please note that with effect from 11 December 2017 a temporary stop has been placed on subscriptions from new shareholders to the Libor Plus Fund. A maximum additional subscription of 1 million per existing shareholder applies at any daily dealing window. Please contact your Insight relationship manager for further information.

SHARE CLASS PERFORMANCE

Source: Insight Investment and Rimes. Fund performance is shown for share class S £ Acc (performance start date 31/03/2011) and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Performance for periods over one year is annualised. Past performance is not a guide to future performance. Please note the value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in May, ending the month with a running yield of 157bp above cash and a 53% weighting to AAA-rated assets. Investor sentiment turned negative in May, weighing on risk assets, driven by the reescalation of US-China trade-war rhetoric and concerns over tariffs on Mexico. Against this backdrop the European structured credit market continued to perform well, with some weakness later in the month as deteriorating macro sentiment put pressure on the asset class. Issuance picked up as issuers looked to price risk more aggressively in a weakening market. US structured credit exhibited stable performance, though there was some weakness in new issue pricing later in the month. Fund performance was driven by a broad-based rise in most sectors and bonds. We largely invested any cash in new issues to benefit from attractively priced seniors and new-issue premium. We continue to believe the long-term strategic value of the asset class is strong.
