

LIQUID ABS FUND

31 January 2019

FUND OBJECTIVE

The Fund seeks to generate a return for investors mainly through investment in a portfolio of liquid asset backed securities (ABS) and corporate floating rate notes (FRNs)

FUND SUMMARY

- Actively managed to aim to deliver positive absolute returns in excess of a cash benchmark
- Aims to add value principally through a focus on daily liquidity management via a high allocation to instruments with short maturities
- Aims to add value principally through AAA and AA rated securities
- Rigorous, disciplined investment process aiming to deliver precision and diversification
- Fitch rated AAaf/S2

SHARE CLASS PERFORMANCE

Source: Insight Investment and Rimes. Fund performance is shown for share class S £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in January, ending the month with a running yield of 89bp above cash and a 91% weighting to AAA-rated assets. Risk assets rallied and European and US structured credit also recovered. In Europe, the lower end of the capital structure in collateralised loan obligations (CLOs) posted strong returns, having suffered the most in December. There was no issuance as markets adapted to new European securitisation regulations. In the US, there was significant supply in consumer asset-backed securities. Performance was strong as spreads at the bottom end of the capital structure generally tightened more than at the top end. Liquidity also returned to more esoteric parts of the market. Against this backdrop, Fund performance was driven by a broad-based rise in most sectors and bonds. We invested cash in some shorter AAA-rated paper trading at the widest spreads. We continue to believe the long-term strategic value of the asset class remains strong.
