# LIQUID ABS FUND

31 December 2020

## FUND OBJECTIVE

The Fund seeks to generate a return for investors mainly through investment in a portfolio of liquid asset backed securities (ABS) and corporate floating rate notes (FRNs)

## FUND SUMMARY

- Actively managed to aim to deliver positive absolute returns in excess of a cash benchmark
- Aims to add value principally through a focus on daily liquidity management, via a high allocation to AAA and AA rated instruments with short maturities
- Rigorous, disciplined investment process aiming to deliver precision and diversification

## SHARE CLASS PERFORMANCE (S £ Acc share class)

Source: Insight Investment and Rimes. Fund performance is shown for share class S £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

## FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in December, ending with a running yield of 82bp ahead of one-month sterling SONIA and a 98% weighting to AAA-rated assets. The European structured credit market performed relatively well with the continuing compression of higher yielding sectors and the flattening of both credit and term structures. There was very limited issuance. The US structured credit market also performed well as we continued to see the flattening of capital structures and the narrowing of the basis between the vanilla and more esoteric sectors. Over the month we continued to add risk in the most senior markets and in higher quality collateral pools. The long-term strategic value of the asset class remains strong: the holdings are all highly rated; the market has a supply/demand imbalance; forecast returns are relatively attractive; and a large percentage of the asset class globally comprises short dated fixed rates or floating rate notes.
