Source: Insight Investment and Rimes. Fund performance is shown for share class S £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for 1-month SONIA (previously 3-Month GBP LIBOR until 1st January 2020). Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in November, ending with a running yield of 54bp ahead of one-month sterling SONIA and a 99% weighting to AAA-rated assets. It was a volatile month for risk assets with the emergence of the Omicron variant causing a sharp reversal in risk sentiment. The European structured credit market was bumpier, similar to broader credit, with marginal weakness in the more well-supplied areas. However, spread widening was very modest. There was, though, some weakness in the more credit-orientated asset classes. There were reasonable levels of issuance in both the European and Australian asset-backed securities (ABS) markets. The US structured credit market also saw some marginal weakness. There was sustained issuance from several areas, especially the esoteric ABS market. Activity was focused on adding risk in liquid European Central Bank eligible paper, while performance was driven by income. The long-term strategic value of the asset class remains strong.
