LOAN FUND

31 October 2020

FUND OBJECTIVE

The Fund seeks to produce an annual interest based return, primarily through investment in a portfolio of loans

FUND SUMMARY

- Targets attractive returns in excess of cash by investing in high quality senior secured loans and other debt
- Aims to provide insulation from interest rate risk
- Employs a defensive asset selection strategy to achieve its return objective
- Offers investors portfolio diversification benefits

SHARE CLASS PERFORMANCE

Source: Insight Investment and Rimes. Fund performance is shown for share class S € Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. The Fund's base currency changed from GBP to EUR on 29 November 2019. Prior to 29 November 2019, Fund performance was shown for a GBP share class and from 29 November 2019 it has been shown for a EUR share class. As a result, the Fund's performance prior to 29 November 2019 has been converted to EUR. Therefore the performance shown will differ with the actual performance experienced in the GBP share class.

FUND MANAGER COMMENTS

The Fund generated a positive return in October and outperformed the CS Western European Institutional Loan Index. After a strong start, rising COVID-19 cases, the US elections and primary issuance caused softness. Strong technicals in loans, and a supportive backdrop in collateralised loan obligations (CLOs), brought more deals to market. In terms of demand for leveraged loans, conditions in the CLO market improved. The index's distress ratio fell from 4.8% in September to 4.1% in October, with the default rate flat at 2.6%. We participated in the Adeventa, Colisee and Neuraxpharm new issues. Positive vaccine news and greater clarity on the US presidential elections helped. The loan market reacted, with COVID-19 related names rallying. The primary leveraged loan pipeline in Europe is thin but could increase. Technicals are strong and so opportunistic borrowers could come to market. We will invest selectively in businesses with decent cashflow generation and in riskier/more cyclical names on a tactical basis.
