

LOAN FUND

31 January 2022

FUND OBJECTIVE

The Fund seeks to produce an annual interest based return, primarily through investment in a portfolio of loans

FUND SUMMARY

- Targets attractive returns in excess of cash by investing in high quality senior secured loans and other debt
- Aims to provide insulation from interest rate risk
- Employs a defensive asset selection strategy to achieve its return objective
- Offers investors portfolio diversification benefits

FUND FACTS

Fund size: €124.2m

Inception date: 31 March 2008

Benchmark: 3 Month EURIBOR

Fund manager: Lorraine Specketer

Target return: Outperform benchmark by 2.5% pa (before tax, fees and expenses). However, a positive return is not guaranteed and a capital loss may occur.

Source: Insight Investment and Rimes. Fund performance is shown for share class S € Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. The Fund's base currency changed from GBP to EUR on 29 November 2019. Prior to 29 November 2019, Fund performance was shown for a GBP share class and from 29 November 2019 it has been shown for a EUR share class. As a result, the Fund's performance prior to 29 November 2019 has been converted to EUR. Therefore the performance shown will differ with the actual performance experienced in the GBP share class.

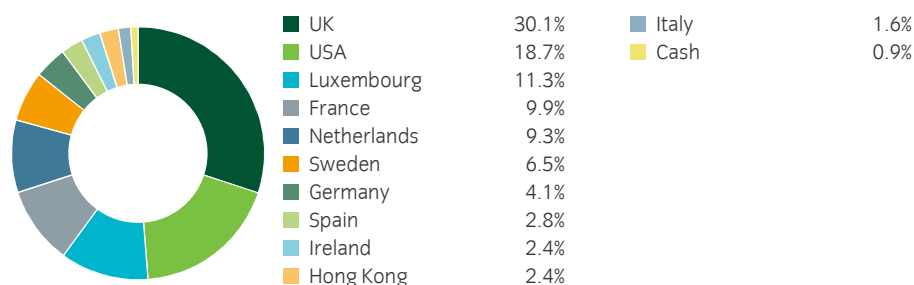

FUND MANAGER COMMENTS

The Fund generated a positive return in January and outperformed the CS Western European Institutional Loan Index. Against a backdrop of increased volatility, the leveraged loan market was largely insulated from what was happening in the wider credit markets. The index's default ratio remained at 0.6% in January, while the distress ratio rose from 0.30% to 0.36%. In the primary market, we bought United Group, Ceramtec, and Wella. In the secondary market, we switched out of INEOS Enterprises and Colisee. With central bank policy tightening, loans' floating-rate nature will provide rate protection and a stable income, but pricing may adjust as fixed-income yields rise. There is uncertainty about the pandemic, supply chain disruption and input cost inflation, but the technical picture is strong. We will invest selectively in businesses with decent cashflow generation and are comfortable taking on more cyclical type exposures, while avoiding more obvious and volatile reopening trades.
