Source: Insight Investment and Rimes. Fund performance is shown for share class A £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for SONIA (previously benchmarked against 3-Month GBP LIBOR until 31st December 2020). Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in March. The European structured credit market performed well with the continuing compression of higher yielding sectors and the flattening of both credit and term structures. COVID-19 impacted asset classes outperformed, with a technical squeeze evident as supply continued to be outweighed by demand. It was a solid month for issuance for the European market. The US structured credit market also generally performed well with continued outperformance of the more esoteric ends of the market and the more junior parts of the capital structure. Turnover was low and performance broad-based. Lending was quiet but our pipelines have grown. The long-term strategic value of the asset class remains strong; lending opportunities are at their most attractive after crises; the holdings are all highly rated; forecast returns are relatively attractive; and a large percentage of the asset class globally comprises short-dated fixed rates or floating rate notes.
