Source: Insight Investment and Rimes. Fund performance is shown for share class S £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

FUND MANAGER COMMENTS

The Fund delivered a negative return over the quarter, outperforming its benchmark. After a strong early opening to 2021 investment grade spreads were driven mildly wider over the month of January by a combination of vaccine rollout difficulties in Europe and increased equity market volatility. Our long credit risk position was a mild negative for performance in January with sector and security selection both contributing positively. February was a month of two halves for sterling investment grade credit as spreads tightened in the first two weeks followed by some widening. The moderate rise in spreads later in the month reflected an increased concern that risk markets could see heightened volatility stemming from the accelerating pace of government yield rises which had started to lift real yields. All credit attribution drivers contributed positively to performance in February. March saw a continuation of the investment grade spread weakness seen in the second half of February despite underlying government bond yields stabilising at higher levels. Both sector and stock selection decisions delivered positively which more than made up for the small drag from credit beta.
