UK GOVERNMENT ALL MATURITIES BOND FUND

31 December 2020

FUND OBJECTIVE

The Fund aims to generate a return by investing principally in sterling denominated fixed interest securities issued by the UK government

FUND SUMMARY

- Actively managed to aim to deliver attractive total returns in excess of a UK government bond benchmark
- Aims to add value principally through duration, yield curve, country allocation and currency management
- Invests primarily in fixed income securities and currencies, either directly or via derivatives
- Rigorous, disciplined investment process drawing on a large team of fixed income and currency specialists

SHARE CLASS PERFORMANCE

Source: Insight Investment and Rimes. Fund performance is shown for share class S £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

FUND MANAGER COMMENTS

The fund outperformed over the quarter. Duration management did not make any contribution to performance. A long 30yr breakeven inflation position in US TIPS was a driver of the outperformance, as inflation pricing rose. UK yield curve positioning made a negative contribution to performance. An overweight position in 30 year gilts offset by underweight position in 20 year and 50 year gilts was the main contributor as 30 year gilts underperformed. The Fund had no exposure to investment grade or high yield credit. Exposure to long positions in Mexican and Brazilian government bonds through the Insight emerging market debt fund was positive for performance. Currency exposure made a no contribution to performance.

FUND FACTS

Fund size: £99.5m

Inception date: 15 November 2004

Benchmark: FTSE Actuaries UK Conventional Gilts All Stocks Index

Fund manager: David Hooker

Target return: Outperform benchmark by 0.75% pa (before tax, fees and expenses) over rolling five year periods. However, a positive return is not guaranteed and a capital loss may occur.
