

UK GOVERNMENT LONG MATURITIES BOND FUND

31 December 2021

FUND OBJECTIVE

The objective of the Fund is to generate a return, comprising both income and capital growth, that exceeds the return of the FTSE Actuaries UK Conventional Gilts Over 15 Years Index (the Fund's Benchmark) by 0.75% per year over a rolling five-year period before the deduction of tax, management charges and expenses (the Target Return).

FUND SUMMARY

- Seeks to deliver attractive total returns in excess of a UK government bond benchmark
- Aims to add value principally through duration, yield curve, country allocation and currency management
- Aims to add value by focusing on longer-dated assets
- Invests primarily in fixed income and currencies, either directly or via derivatives
- Rigorous, disciplined investment process drawing on a large team of fixed income and currency specialists

Source: Insight Investment and Rimes. Fund performance is shown for share class P £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

FUND MANAGER COMMENTS

The Fund underperformed over the quarter. Duration was a negative for performance. A short position in long-dated UK gilts was the main contributor. Country allocation contributed positively to performance. A long position in 10-year Australian bonds out of 10-year US Treasuries was opened during the quarter. UK yield-curve positioning made a negative contribution to performance. A 30s50s yield curve steepening position was the main driver. Stock selection decisions did not make any contribution to performance. The Fund had no exposure to investment grade credit, high yield or EMD. Currency exposure made a positive contribution to performance. The preference to be long USD was the main contributor.

FUND FACTS

Fund size: £54.6m

Inception date: 19 November 2004

Benchmark: FTSE Actuaries UK Conventional Gilts Over 15 Years Index

Fund manager: David Hooker

Target return: Outperform benchmark by 0.75% per year over a rolling five-year period before the deduction of tax, management charges and expenses. However, a positive return is not guaranteed and a capital loss may occur.
