Source: Insight Investment and Rimes. All performance is annualised. Fund performance is shown for share class 3 and is calculated in Sterling as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for SONIA (previously 7-day GBP LIBID until 1st October 2020). The Public Debt CNAV Insight Liquidity Funds are investment funds and not banking products and whilst preservation of capital is a major component of the objective of the funds it is not guaranteed. Neither Insight nor any other BNYM group company will provide capital support for the Public Debt CNAV Insight Liquidity Funds in the event of any capital loss arising within the funds. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. Please note: data is provisional and may change.

FUND MANAGER COMMENTS

Annual inflation increased to 4% in December. The 10bp rise was mainly due to a faster rate of growth in alcohol and tobacco prices. The Manufacturing Purchasing Managers' Index (PMI) rose from 46.2 in December to 47.0 in January, while the Services PMI increased from 53.4 to 54.3 over the same period. In markets, SONIA remained unchanged at 5.19%, the 2-year gilt yield rose from 3.96% to 4.25% and the 5-year gilt yield increased from 3.56% to 3.76. While the inflation outlook appears positive and markets are pricing in no further rate hikes, selective term investments were favoured. Positioning will be determined by upcoming central bank meetings. The weighted average maturity of the Fund was 24 days at the end of December and 23 days at the end of January.
