Source: Insight Investment and Rimes. All performance is annualised. Fund performance is shown for share class 3 and is calculated in Sterling as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for SONIA (previously 7-day GBP LIBID until 1st October 2020). The Public Debt CNAV Insight Liquidity Funds are investment funds and not banking products and whilst preservation of capital is a major component of the objective of the funds it is not guaranteed. Neither Insight nor any other BNYM group company will provide capital support for the Public Debt CNAV Insight Liquidity Funds in the event of any capital loss arising within the funds. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. Please note: data is provisional and may change.

## FUND MANAGER COMMENTS

At its December meeting, the Bank of England Monetary Policy Committee (MPC) voted 5-4 to cut the base rate by 0.25% to 3.75%. The MPC's decision followed a more-than-expected fall in headline annual inflation to 3.2% in November, down from 3.6% in October. In markets, SONIA fell by 24bp to 3.73%, the 2-year gilt yield rose from 3.62% to 3.71%, while the 5-year gilt yield rose from 3.89% to 3.90%. Activity on the fund in December was light. With market pricing discounting the Bank of England rate cut, activity focused on managing positions over year-end. Collateral availability remained high and there was ample short-dated supply to meet demand. Whilst conditions remained benign, term opportunities remained scarce and so activity focused on short-date positioning.
