Fund performance is shown for share class 3 and is calculated in Sterling as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for SONIA (previously 7-day GBP LIBID until 1st October 2020). The Public Debt CNAV Insight Liquidity Funds are investment funds and not banking products and whilst preservation of capital is a major component of the objective of the funds it is not guaranteed. Neither Insight nor any other BNYM group company will provide capital support for the Public Debt CNAV Insight Liquidity Funds in the event of any capital loss arising within the funds. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested. Please note: data is provisional and may change.

FUND MANAGER COMMENTS

The Bank of England kept interest rates unchanged, in line with market expectations, in a unanimous decision, with all nine Monetary Policy Committee members voting to maintain rates. Annual Consumer Price Index (CPI) inflation remained at 3.0%, while the core rate rose slightly to 3.2%. The 2-year gilt yield rose by 99bp to 4.41%, while the 5-year gilt yield rose by 27bp to 4.51%. With the ongoing conflict in the Middle East creating uncertainty over the path of interest rates, the majority of trades focused on highly liquid, short-dated maturities of up to 3 months. Some selective term investments were made in 6 months at 4.21%, and into January 2027 at levels between 4.36 and 4.45%. The fund will continue to maintain a conservative WAM in the absence of any de-escalation.
