

LONG DATED BUY AND MAINTAIN FUND

31 March 2023

FUND OBJECTIVE

The Fund seeks to generate a return for investors by investing primarily in a portfolio of debt securities

FUND SUMMARY

- Actively managed to aim to deliver an attractive absolute return through a long-term low turnover investment approach, targeting bonds with a maturity of over 10 years
- Aims to add value principally through attractive credits, continually managed to reflect Insight's credit views
- Aims to avoid flaws of a market-weight based benchmark approach, such as limiting unwanted concentration or bias towards most indebted issuers
- Rigorous, disciplined investment process drawing on a large team of credit analysts

Source: Insight Investment and Rimes. Fund performance is shown for share class S £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark measure shown is for the iBoxx GBP Corporate & Collateralised over 10 year ex-T1 & UT2, 1.5% issuer cap, 25% level 3 sector cap Index, which has been used as a comparator for performance purposes. Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

FUND MANAGER COMMENTS

Credit spreads performed well in January and February before gapping significantly wider in March following the collapse of Silicon Valley Bank in the US and turmoil surrounding Credit Suisse. The latter was quickly resolved in a manner that respected the bond capital hierarchy but highlighted that inflicting write-downs on senior creditors in systemically important financial institutions is fraught with unknown consequences. Ultimately, regulators chose not to do so. This restored much confidence in the broader bank funding market and saw spreads on bank bonds rally significantly. The fund's financial positions benefited from this rally. Away from financials, the property sector continues to struggle with many hybrid instruments (to which the fund has no exposure) trading to distressed levels. The fund's broader property exposure detracted but we remain comfortable with the issuers in the longer term. In the quiet before the March turmoil, the primary market had begun to re-establish itself, much of it at attractive levels. The fund participated in new issuance from EDF and National Grid. There were no sales during the quarter for credit related reasons.
