Source: Insight Investment and Rimes. Fund performance is shown for share class A £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for SONIA (previously benchmarked against 3-Month GBP LIBOR until 31st December 2020). Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in June. Risk assets mostly posted gains despite diverging economic data and a lack of clarity around US monetary policy. European structured credit saw robust issuance, which was easily absorbed by investors seeking investment grade carry. The most active sectors included consumer asset-backed securities (ABS) and collateralised loan obligations (CLOs). Activity within commercial mortgage-backed securities was limited, as valuation weakness within certain sectors led to subdued primary issuance. US structured credit saw strong supply, primarily within high quality consumer ABS and agency issuance. The Fund made a range of investments, including automotive ABS in Europe, UK credit cards, US middle-market CLOs and a significant risk transfer transaction backed by a portfolio of small and medium-sized enterprise loans in the UK, originated by a large retail bank. Performance was primarily driven by carry.
