Source: Insight Investment and Rimes. Fund performance is shown for share class A £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for SONIA (previously benchmarked against 3-Month GBP LIBOR until 31st December 2020). Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

## FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in August. Risk assets performed well due to resilient economic activity and falling inflation. European structured credit had a positive month, driven by carry. Year-to-date issuance amounts to €96 billion, driven by collateralised loan obligations, residential mortgage-backed securities and automotive asset-backed securities (ABS). Fundamental performance continues to be robust and technical are extremely strong. US structured credit saw subdued issuance with spreads largely unchanged. Higher beta assets outperformed. Despite mixed economic data, concerns around trade policies and central bank independence, and a weakening US dollar, investor demand for risky US ABS remains strong. Fund activity was subdued as we remain fully invested. We expect to rotate out of short-dated AAA-rated paper and publicly issued mezzanine bonds trading at tight spreads into private assets to take advantage of the illiquidity premium.
