Source: Insight Investment and Rimes. Fund performance is shown for share class A £ Acc and is calculated as total return, including reinvested income, gross of fees and expenses. Gross of fees performance results do not reflect the deduction of charges, which will reduce investors' returns. Benchmark performance shown is for SONIA (previously benchmarked against 3-Month GBP LIBOR until 31st December 2020). Performance for periods over one year is annualised. Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may be partly due to exchange rate fluctuations). Investors may not get back the full amount invested.

FUND MANAGER COMMENTS

The Fund outperformed its cash benchmark in September. Risk assets were mixed amid more cautious investor sentiment. European structured credit finished the month strongly, showing resilience against market volatility. Issuance was robust. US structured credit saw a rebound in primary issuance, which reached \$37 billion. Spreads were largely unchanged, except for the mezzanine part of the subprime automotive sector, where spread widening was caused by the collapse of Tricolor, a company engaged in fraudulent activity. We remain constructive on Tier 1 and Tier 2 issuers in the sector. In September, the Fund rotated out of short-dated AAA rated paper in Australia into mezzanine tranches in US non-qualified mortgages and into the Italian consumer sector. We also funded a private trade finance transaction. We took the opportunity to sell some of the weaker collateralised loan obligations, taking advantage of high cash prices and the limited differentiation from stronger pools.
